## Part I Introduction

- |          |  |          |
|----------|--|----------|
| <b>1</b> | <b>Foreword to the Proceedings of the Final Workshop . . . . .</b> | <b>3</b> |
|          | R. Dénos   |          |
| <b>2</b> | <b>AIM: An Introduction to the Project. . . . .</b>                | <b>5</b> |
|          | Fritz Boden  |          |

## Part II Wing Deformation Studies

- |          |   |           |
|----------|---|-----------|
| <b>3</b> | <b>Highly Accurate Aircraft In-Flight Wing Deformation<br/>Measurements Based on Image Correlation. . . . .</b> | <b>15</b> |
|          | H. P. J. Veerman, H. Kannemans and H. W. Jentink  |           |
| <b>4</b> | <b>IPCT Ground Vibration Measurements on a Small Aircraft . . . .</b>   | <b>33</b> |
|          | Fritz Boden, Thomas Wolf, Claudio Lanari and Anwar Torres   |           |
| <b>5</b> | <b>In-Flight IPCT Wing Deformation Measurements<br/>on a Small Aircraft . . . . .</b>                           | <b>57</b> |
|          | Fritz Boden, Claudio Lanari, Anwar Torres and Thorsten Weikert  |           |
| <b>6</b> | <b>Assessment of IPCT for Wing Deformation Measurements<br/>on Small Aircrafts . . . . .</b>                    | <b>73</b> |
|          | Pavel Ružička, Jan Rýdel, Miroslav Josefik and Fritz Boden  |           |
| <b>7</b> | <b>IPCT Wing Deformation Measurements on a Large<br/>Transport Aircraft . . . . .</b>                           | <b>93</b> |
|          | Fritz Boden, Henk Jentink and Christian Petit   |           |

### Part III Propeller Deformation Studies

- 8 Propeller Deformation Study on an P 180 Push Propeller Aircraft.** . . . . . 119  
 Claudio Lanari and Fritz Boden
- 9 Image Based Propeller Deformation Measurements on the Piaggio P 180.** . . . . . 133  
 Claudio Lanari, Boleslaw Stasicki, Fritz Boden and Anwar Torres
- 10 Assessment of Propeller Deformation Measurement Techniques for Industrial Application.** . . . . . 155  
 Pavel Ružička, Jan Rýdel, Miroslav Josefik, Fritz Boden and Claudio Lanari

### Part IV Helicopter Investigations

- 11 Towards In-Flight Measurements of Helicopter Blade Tip Vortices** . . . . . 171  
 Kolja Kindler, Karen Mulleners and Markus Raffel
- 12 1.5  $\mu$ m LIDAR for Helicopter Blade Tip Vortex Detection** . . . . . 187  
 Béatrice Augere, Claudine Besson, Agnès Dolfi, Didier Fleury, Didier Goular and Matthieu Valla
- 13 Blade Deformation Measurements with IPCT on an EC 135 Helicopter Rotor** . . . . . 195  
 Christoph Maucher and Fritz Boden
- 14 Applications of Infrared Technology to Helicopter Flight Testing.** . . . . . 215  
 Laurent Girard

### Part V Flow Measurements

- 15 In-Flight Application of Pressure Sensitive Paint** . . . . . 237  
 Yasuhiro Egami, Christian Klein, Ulrich Henne, Klaus de Groot, Jörg B. Meyer, Claus-Peter Krückeberg and Fritz Boden

<b>16</b>	<b>Development of Particle Image Velocimetry for In-Flight Flow Measurement . . . . .</b>	<b>269</b>

Advanced In-Flight Measurement Techniques

Boden, F.; Lawson, N.; Jentink, H.W.; Kompenhans, J.  
(Eds.)

2013, XIX, 344 p. 271 illus., 135 illus. in color.,

Hardcover

ISBN: 978-3-642-34737-5
