

Contents

1	Motivation and Background	1
1.1	Motivation	1
1.2	Volcanic Activity on Earth	3
1.2.1	1783–1784 AD Laki Flood Lava Eruption	4
1.3	Volcanic Gases	8
1.3.1	Time-Averaged Volcanic Sulphur Emissions	9
1.4	Tropospheric Volcanic Aerosol	10
1.4.1	Tropospheric Sulphur Cycle	10
1.4.2	Aerosol Particle Size Distribution	11
1.4.3	Particle Composition and Morphology	13
1.4.4	Particle Activation	14
1.5	Impact of Volcanic Activity on the Earth System	14
1.5.1	Impact on Climate and Dynamics	14
1.5.2	Impact on Environment and Society	20
1.6	Thesis Aims	23
	References	24
2	GLOMAP-Mode Overview	31
2.1	Introduction	31
2.2	TOMCAT Chemical Transport Model	32
2.3	Gas-Phase Species and Chemistry	32
2.4	Aerosol Size Distribution	34
2.5	Primary Aerosol Emissions	35
2.6	Aerosol Microphysical Processes	36
2.6.1	Aerosol Activation	39
2.7	Conclusions	40
	References	40

3	The Role of Time-Averaged Volcanic Sulphur Emissions in the Pre-industrial Era	45
3.1	Introduction	45
3.2	Data and Methods	47
3.3	Results and Discussion	50
3.3.1	Global Sulphur Budget	50
3.3.2	Impact on CCN Number Concentrations	54
3.3.3	First Aerosol Indirect Effect	59
3.4	Conclusions	60
3.5	Implications and Future Work	62
	References	62
4	Impact of the 1783–1784 AD Laki Eruption on Global Aerosol Formation Processes and Cloud Condensation Nuclei	65
4.1	Introduction	65
4.2	Experimental Design and Emissions	66
4.3	Results and Discussion	68
4.3.1	SO ₂ and SO ₄ Mixing Ratios and Burdens	68
4.3.2	Depletion of Oxidants	73
4.3.3	Comparison with Previous Studies	75
4.3.4	Comparison with Sulphate Deposition Record in Ice-Cores	77
4.3.5	Comparison with Historical Records	79
4.3.6	Aerosol Microphysical Processes and Size Distribution	82
4.3.7	Impact on Total Particle Number Concentration	84
4.3.8	Impact on CCN Number Concentrations	86
4.4	Conclusions	91
	References	93
5	Impact of the 1783–1784 AD Laki Eruption on Cloud Drop Number Concentrations and the First Aerosol Indirect Effect	97
5.1	Introduction	97
5.2	Data and Methods	99
5.3	Results	100
5.3.1	Widespread Impact on Cloud Drop Number Concentrations	100
5.3.2	Physically-Based Aerosol Activation Scheme Versus Empirically-Based Relationship	103
5.3.3	First Aerosol Indirect Effect	106
5.4	Discussion	108
5.5	Conclusions	110
	References	111

6	What if a Laki-Style Eruption were to Happen Tomorrow?	113
6.1	Introduction	113
6.2	Data and Methods	115
6.3	Results	119
6.3.1	Impact on European Air Quality	119
6.3.2	Excess Mortality in Europe	120
6.4	Discussion	123
6.5	Implications	126
	References	127
7	Conclusions	129
7.1	Summary of Major Findings	129
7.2	Future Work	132
	References	134
	Appendix A.	135
	Appendix B.	137
	Glossary	139

Modelling Tropospheric Volcanic Aerosol
From Aerosol Microphysical Processes to Earth System
Impacts

Schmidt, A.

2013, XV, 145 p., Hardcover

ISBN: 978-3-642-34838-9
