

# Table of Contents

<b>1</b>	<b>Prologue</b>	<b>1</b>
1.1	Computer Networks and the Internet – A Historical Perspective . . .	3
1.1.1	ARPANET . . . . .	3
1.1.2	Internet . . . . .	5
1.1.3	World Wide Web . . . . .	6
1.1.4	Web 2.0 and the Semantic Web . . . . .	7
1.2	A Guide Through the World of the Internet . . . . .	8
1.2.1	Internet Architecture Board – IAB . . . . .	9
1.2.2	Internet Society – ISOC . . . . .	13
1.2.3	IANA and ICANN . . . . .	14
1.2.4	World Wide Web Consortium . . . . .	17
1.2.5	Open Standards in the Internet – Regulated Anarchy . . . . .	18
1.2.6	German Participants and Providers . . . . .	22
1.3	Glossary . . . . .	25
<b>2</b>	<b>The Foundation of the Internet : TCP/IP Reference Model</b>	<b>29</b>
2.1	Communication Protocol and the Layer Model . . . . .	29
2.1.1	Protocol Families . . . . .	30
2.1.2	The Layer Model . . . . .	31
	<b>Excursus 1: ISO/OSI Reference Model</b> . . . . .	38
2.2	The Physical Layer as the Basis for Computer Communication . . .	43
2.2.1	Physical Transmission Media . . . . .	43
2.2.2	Characteristic Properties of Physical Transmission Media . . .	44
2.3	The TCP/IP Reference Model . . . . .	45
2.3.1	Historical Background and Distinction from the ISO/OSI Reference Model . . . . .	47
2.3.2	Link Layer . . . . .	49
2.3.3	Internet Layer . . . . .	52
2.3.4	Transport Layer . . . . .	54
2.3.5	Application Layer . . . . .	56
2.4	Glossary . . . . .	58

<b>3</b>	<b>Physical Layer</b>	63
3.1	Theoretical Principles	65
3.1.1	Electromagnetic Spectrum and Signal Transmission	68
3.1.2	Bandwidth-restricted Signals	75
3.2	Encoding Digital Signals	80
3.2.1	Line Coding	80
3.2.2	Analog Modulation Methods	87
3.2.3	Digital Modulation Methods	89
3.2.4	Multiplex Methods with a Constant Bandwidth	95
3.2.5	Spread Spectrum Methods	102
3.3	Guided Transmission Media	109
3.3.1	Coaxial Cables	110
3.3.2	Twisted Pair Cables	111
3.3.3	Fiber Optic Cables	114
3.4	Wireless Transmission Media	119
3.4.1	Radio Transmission via Short Waves and Ultra-short Waves	120
3.4.2	Data Transmission via Microwaves	121
3.4.3	Infrared, Millimeter Waves and Optical Transmission	123
3.4.4	Satellite Communication	123
3.5	Glossary	125
<b>4</b>	<b>Network Access Layer (1): Wired LAN Technologies</b>	131
4.1	Network Access Layer	131
4.1.1	Elementary Tasks and Protocols	132
4.1.2	Medium Access Control Layer	140
4.1.3	Logical Link Control	141
4.2	LANs – Local Area Networks	142
4.2.1	Use of Shared Communication Channels	143
4.2.2	The Importance of LANs	144
4.2.3	IEEE 802 Local Area Networks	144
4.2.4	Local Address Management	151
4.2.5	Local Data Administration	157
4.2.6	Special Network Hardware	158
4.3	Important Examples of LAN Technologies	160
4.3.1	LAN Topologies	160
4.3.2	Ethernet – IEEE 802.3	166
	<b>Excursus 2:</b> Ethernet – Timing and Collision Handling	176
	<b>Excursus 3:</b> Ethernet – Performance Analysis	193
4.3.3	Token Ring – IEEE 802.5	200
4.3.4	Fiber Distributed Data Interface – FDDI	212
4.3.5	Asynchronous Transfer Mode – ATM	226
	<b>Excursus 4:</b> ATM – Cell Switching	240
4.4	LAN Expansion	242
4.4.1	Limitations of LAN Technology	242
4.4.2	Repeaters	243

4.4.3	Hubs .....	244
4.4.4	Bridges .....	245
4.4.5	Switches .....	252
4.4.6	Virtual LANs .....	254
4.5	Glossary .....	257
<b>5</b>	<b>Network Access Layer (2): Wireless Mobile LAN Technologies .....</b>	<b>261</b>
5.1	Fundamentals of Wireless and Mobile Network Technologies .....	261
5.2	Wireless LAN (WLAN) – IEEE 802.11 .....	265
5.2.1	IEEE 802.11 – Physical Layer .....	266
5.2.2	IEEE 802.11 – MAC Sublayer .....	267
5.2.3	IEEE 802.11 – Data Format .....	274
5.2.4	WLAN Security .....	286
	<b>Excursus 5: Critical Points Regarding the WEP Procedure .....</b>	<b>294</b>
5.3	Bluetooth – IEEE 802.15 .....	307
5.3.1	Bluetooth Technology .....	308
5.3.2	Bluetooth Protocol Stack .....	311
5.3.3	Bluetooth Security .....	319
5.3.4	Bluetooth Profile .....	321
5.4	ZigBee – IEEE 802.15.4 .....	323
5.4.1	ZigBee Technology .....	323
5.4.2	ZigBee Protocols and Addressing .....	325
5.4.3	ZigBee Security .....	328
5.5	Further radio-based network technologies .....	329
5.6	Glossary .....	331
<b>6</b>	<b>Network Access Layer (3): WAN Technologies .....</b>	<b>335</b>
6.1	Introduction .....	335
6.2	Packet Switching in the WAN .....	336
6.2.1	Basic Principles .....	336
6.2.2	Layout of a WAN .....	338
6.2.3	Store-and-forward Switching .....	339
6.2.4	Addressing in the WAN .....	340
6.3	Routing .....	342
6.3.1	The Network as a Graph .....	342
6.3.2	Calculation of the Routing Table in the WAN .....	343
6.3.3	Isolated Routing Algorithms .....	347
	<b>Excursus 6: Dijkstra Algorithm .....</b>	<b>350</b>
6.3.4	Distance Vector Routing .....	352
6.3.5	Link-State Routing .....	360
	<b>Excursus 7: Special Routing Procedures .....</b>	<b>364</b>
	<b>Excursus 8: Routing Procedures for Networks with Mobile Components .....</b>	<b>372</b>
6.4	Important Examples of WAN Technologies .....	380
6.4.1	ARPANET .....	381

6.4.2	X.25 .....	385
6.4.3	ISDN .....	389
	<b>Excursus 9: ISDN – Data Formats</b> .....	393
6.4.4	Frame Relay .....	396
6.4.5	Broadband ISDN and ATM .....	403
6.4.6	Distributed Queue Dual Bus – DQDB .....	404
6.4.7	Cyclic Reservation Multiple Access – CRMA .....	409
6.4.8	Plesiochronous Digital Hierarchy – PDH .....	413
6.4.9	Synchronous Digital Hierarchy – SDH, SONET .....	416
6.4.10	Worldwide Interoperability for Microwave Access (WiMAX) – IEEE 802.16 .....	419
6.5	Access to the WAN .....	424
6.5.1	Access via the Telephone Network – Modems .....	426
6.5.2	Access over ISDN .....	429
6.5.3	Access via Digital Subscriber Line – DSL .....	430
6.5.4	Wireless Access to the WAN – GSM, UMTS and LTE ....	433
6.5.5	Alternative Access Procedures .....	447
6.6	Glossary .....	450
<b>7</b>	<b>Internet Layer</b> .....	455
7.1	Virtual Networks .....	456
7.2	Internetworking .....	460
7.2.1	Connection-Oriented Internetworking .....	462
7.2.2	Connectionless Internetworking .....	463
7.2.3	Tunneling .....	464
7.2.4	Fragmentation .....	466
7.2.5	Congestion Avoidance .....	468
7.2.6	Quality of Service .....	476
7.2.7	Internetwork Routing .....	480
7.3	Internet Protocol – IP .....	481
7.3.1	IP Addressing .....	483
7.3.2	Binding of Protocol Addresses .....	493
7.3.3	IP Datagram .....	498
	<b>Excursus 10: IP Encapsulation and IP Fragmenting</b> .....	502
7.4	Internet Protocol Version 6 – IPv6 .....	506
7.4.1	Properties and Features of IPv6 .....	507
7.4.2	The IPv6 Datagram .....	509
7.4.3	IPv6 Fragmentation, Jumbogram and IPv6 Routing .....	515
7.4.4	IPv6 Addressing .....	519
7.4.5	IPv6 Autoconfiguration .....	527
7.4.6	Coexistence and Migration of IPv4 to IPv6 .....	530
7.5	IPsec – Secure Communication on the Internet Layer .....	536
7.5.1	IPsec Security Architecture .....	537
7.5.2	IPsec Authentication Header (AH) .....	540
7.5.3	IPsec Encapsulation Security Payload (ESP) .....	543

7.5.4	IPsec Support Components .....	546
	<b>Excursus 11: IPsec - Key Management</b> .....	550
7.6	Internet Control Message Protocol – ICMP .....	558
7.6.1	Function of ICMP .....	559
7.6.2	ICMP Message Format .....	560
7.6.3	ICMP Error Messages .....	560
7.6.4	ICMP Requests and Informal Messages .....	563
7.6.5	ICMPv6 .....	568
7.6.6	Neighbor Discovery Protocol – NDP .....	573
7.7	Mobile IP .....	576
7.7.1	Fundamental Problems and Requirements .....	577
7.7.2	Principal Operating Sequence .....	578
7.7.3	Mobile IP Message Format .....	580
7.7.4	Mobile IP and Routing Efficiency .....	585
7.7.5	Mobile IP Version 6 – MIPv6 .....	585
7.8	Glossary .....	587
<b>8</b>	<b>Transport Layer</b> .....	591
8.1	Tasks and Protocols of the Transport Layer .....	592
8.1.1	Services of the Transport Layer – an Overview .....	593
8.1.2	Communication End Points and Addressing .....	596
8.1.3	TCP and UDP Ports and Sockets .....	596
8.1.4	Service Primitives on the Transport Layer .....	598
8.2	User Datagram Protocol – UDP .....	601
8.2.1	Tasks and Functions of UDP .....	601
8.2.2	UDP Message Format .....	602
8.2.3	UDP Applications .....	603
8.3	Transmission Control Protocol – TCP .....	604
8.3.1	Functions and Tasks of TCP .....	606
	<b>Excursus 12: TCP - Connection Management</b> .....	617
8.3.2	TCP Message Format .....	619
8.3.3	TCP – Reliability, Flow Control and Overload Control ....	625
8.4	Network Address Translation – NAT .....	633
8.4.1	NAT – Functions and Tasks .....	634
8.4.2	NAT – Application Possibilities .....	637
8.4.3	NAT – Advantages and Disadvantages .....	643
8.5	Security on the Transport Layer .....	645
8.5.1	Transport Layer Security and Secure Socket Layer – TLS/SSL .....	646
	<b>Excursus 13: TLS/SSL Handshake Procedure</b> .....	650
8.6	Glossary .....	659

<b>9</b>	<b>Application Layer and Internet Applications</b>	<b>665</b>
9.1	Principles, Function and Overview	665
9.1.1	Internet Services and Application Layer Protocols	666
9.1.2	Model of Client-/Server Interaction	668
9.1.3	Socket Interfaces	670
9.2	Name and Directory Services	671
9.2.1	Domain Name System – DNS	672
	<b>Excursus 14: Secure DNS – Domain Name System Security</b>	
	Extensions	694
9.2.2	Directory Services	700
9.3	Electronic Mail – Email	703
9.3.1	Message Handling Systems	704
9.3.2	Email Message Formats	709
9.3.3	MIME Standard	711
9.3.4	Simple Mail Transfer Protocol – SMTP	715
9.3.5	POP und IMAP	718
9.3.6	Pretty Good Privacy – PGP	725
9.4	File Transfer	730
9.4.1	(Secure) File Transfer Protocol – FTP and SFTP	731
9.4.2	Trivial File Transfer Protocol – TFTP	737
9.4.3	Network File System – NFS	741
9.4.4	Remote Procedure Call – RPC	744
9.5	Remote Login	747
9.5.1	Telnet	748
9.5.2	Remote Login – rlogin	752
9.5.3	Secure Shell – SSH	754
9.6	Network Management	756
9.6.1	Dynamic Host Configuration Protocol – DHCP	757
9.6.2	Simple Network Management Protocol – SNMP	766
9.7	Audio and Video Communication	779
9.7.1	Multimedia Applications on the Internet	779
9.7.2	Real-time Transport Protocol – RTP	785
9.7.3	RTP Control Protocol – RTCP	788
9.7.4	Real Time Streaming Protocol – RTSP	790
9.7.5	Resource Reservation and Service Quality	793
9.8	Other Internet Services and Applications	801
9.8.1	World Wide Web	801
9.8.2	Peer-to-Peer Applications	804
9.8.3	Internet Relay Chat – IRC	812
9.8.4	Usenet News	813
9.8.5	Other Service Offerings Via TCP/IP	815
9.9	Security at the Application Layer – Packet Filters and Firewalls	818
9.9.1	Packet Filter	820
9.9.2	Gateways	821
9.9.3	Firewalls – Topology	821

Table of Contents	XIII
<b>Excursus 15: The Lock-Keeper Technology</b> .....	822
9.10 Glossary .....	826
<b>10 Epilogue</b> .....	831
<b>List of Persons</b> .....	839
<b>Abbreviations and Acronyms</b> .....	849
<b>Bibliography</b> .....	867
<b>Index</b> .....	879
