

Contents

Widening Spectrum of Prions Causing Neurodegenerative Diseases	1
Stanley B. Prusiner	
β-Amyloid Fibril Structures, In Vitro and In Vivo	19
Robert Tycko	
Structure-Activity Relationship of Amyloids	33
Jason Greenwald and Roland Riek	
Seeding and Cross-seeding in Amyloid Diseases	47
Per Westermark and Gunilla T. Westermark	
The Prion-Like Aspect of Alzheimer Pathology	61
Sarah K. Fritschi, Bahareh Eftekharzadeh, Giusi Manfredi, Tsuyoshi Hamaguchi, Götz Heilbronner, Amudha Nagarathinam, Franziska Langer, Yvonne S. Eisele, Lary Walker, and Mathias Jucker	
Amyloid-β Transmissibility	71
C. Duran-Aniotz, R. Morales, I. Moreno-Gonzalez, and C. Soto	
Prion-Like Properties of Assembled Tau Protein	87
Florence Clavaguera, Markus Tolnay, and Michel Goedert	
Accumulating Evidence Suggests that Parkinson's Disease Is a Prion-Like Disorder	97
Nolwen L. Rey, Elodie Angot, Christopher Dunning, Jennifer A. Steiner, and Patrik Brundin	
Propagation and Replication of Misfolded SOD1: Implications for Amyotrophic Lateral Sclerosis	115
Anne Bertolotti	

Development of Drugs That Target Proteopathic Seeds Will Require Measurement of Drug Mechanism in Human Brain	123
Peter T. Lansbury Jr	
The Role of Functional Prions in the Persistence of Memory Storage	131
Eric R. Kandel, Irina Derkatch, and Elias Pavlopoulos	
Index	153

Proteopathic Seeds and Neurodegenerative Diseases

Jucker, M.; Christen, Y. (Eds.)

2013, XII, 156 p., Hardcover

ISBN: 978-3-642-35490-8
