1	Introduction	1
1.1	Background	3
1.1.1	Fundamentals of Light Interaction with Materials	3
1.1.2	Taxonomy of Light Scattering Functions	5
1.1.3	Modeling and Rendering Pipeline of Material Appearance	8
1.2	Data Coherence for Appearance Modeling	9
1.2.1	Data Coherence	9
1.2.2	Coherence-Based Reconstruction	12
1.2.3	A General Framework for Coherence-Based Appearance Modeling	13
1.3	Overview	14
1.3.1	Acquisition and Modeling of Opaque Surfaces	14
1.3.2	Modeling and Rendering of Subsurface Light Transport	15
1.3.3	Material Fabrication	16
	References	16
 Part I Acquisition and Modeling of Opaque Surfaces		
2	Surface Reflectance Overview	21
2.1	Surface Reflectance Acquisition	21
2.1.1	Direct Measurement	21
2.1.2	Angular Coherence	22
2.1.3	Spatial Coherence	23
2.2	Interactive Modeling and Editing	24
	References	25
3	Efficient SVBRDF Acquisition with Manifold Bootstrapping	27
3.1	Related Work	29
3.2	SVBRDF Manifold Bootstrapping	30
3.2.1	Representative and Key Measurement	30
3.2.2	Manifold Bootstrapping Overview	31
3.2.3	Manifold Bootstrapping Details	33

3.2.4	Synthetic Enlargement for Representatives	34
3.2.5	Key Measurement Validation	35
3.3	SVBRDF Data Acquisition	36
3.3.1	Acquiring Representatives: BRDF Samples	36
3.3.2	Acquiring Keys: Reflectance Maps	38
3.4	Experimental Results	40
3.4.1	Method Validation	41
3.4.2	SVBRDF Capture Results	42
3.5	Conclusion	46
	References	47
4	Interactive SVBRDF Modeling from a Single Image	49
4.1	Related Work	52
4.2	System Overview	53
4.3	User-Assisted Shading Separation	54
4.3.1	Separation as Optimization	55
4.3.2	Interactive Refinement	56
4.3.3	Discussion	58
4.4	Two-Scale Normal Reconstruction	59
4.5	User-Assisted Specular Assignment	62
4.6	Experimental Results	64
4.7	Conclusion	69
	References	71
Part II Modeling and Rendering of Subsurface Light Transport		
5	Overview of Subsurface Light Transport	75
5.1	Computing Subsurface Light Transport	75
5.2	Capturing Subsurface Scattering Effects	76
	References	76
6	Modeling Subsurface Light Transport with the Kernel Nyström Method	79
6.1	Related Work	80
6.2	The Kernel Nyström Method	82
6.2.1	Kernel Extension	83
6.2.2	Estimating the Light Transport Kernel f	84
6.3	Adaptive Light Transport Measurement	85
6.4	Results and Discussions	87
6.4.1	Method Validation	88
6.4.2	Subsurface Scattering Results	92
6.4.3	Discussion	92
6.5	Conclusion	93
	References	93
7	Modeling and Rendering Subsurface Scattering Using Diffusion Equations	95
7.1	Related Work	97

7.2	Overview	98
7.3	Acquisition of Material Model	100
7.3.1	Data Capture	100
7.3.2	Volumetric Model Acquisition	102
7.3.3	Adjoint Method for Gradient Computation	103
7.3.4	GPU-Based Diffusion Computation	104
7.3.5	Discussion	104
7.4	Rendering and Editing	105
7.4.1	Polygrid Construction	106
7.4.2	GPU-Based Polygrid Diffusion Computation	108
7.4.3	Hierarchical Acceleration	111
7.4.4	Editing	112
7.5	Experimental Results	113
7.6	Conclusion	118
	References	119
8	Modeling Textured Translucent Materials with Lazy Solid Texture	
	Synthesis	121
8.1	Previous Work	123
8.2	Overview and Terminology	124
8.3	3D Candidates Selection	125
8.3.1	Color Consistency	126
8.3.2	Triples of Coherent Candidates	127
8.3.3	Candidate Slab	128
8.4	Lazy Solid Synthesis	129
8.4.1	Parallel Solid Texture Synthesis	129
8.4.2	Lazy Subset Synthesis	132
8.5	Implementation and Results	133
8.5.1	Candidate Pre-computation	133
8.5.2	GPU Implementation	134
8.5.3	Rendering	135
8.5.4	Full Volume Synthesis and Comparisons	135
8.5.5	Solid Synthesis for Translucent Objects	136
8.6	Discussion and Conclusions	138

Part III Material Fabrication

9	Overview of Material Fabrication	143
9.1	Hardware	143
9.1.1	Basic Considerations	143
9.1.2	Milling Machine	144
9.1.3	3D Printer	145
9.1.4	Conventional Printer	146
9.2	Material Fabrication	147
9.2.1	Diffuse Shading	147

9.2.2	Surface Reflectance	149
9.2.3	Subsurface Scattering	150
9.2.4	Deformation Behavior	150
	References	151
10	Fabricating Spatially-Varying Subsurface Scattering	153
10.1	Related Work	155
10.2	System Pipeline	156
10.3	Material Mapping	160
10.3.1	Homogeneous BSSRDFs	160
10.3.2	Heterogeneous BSSRDFs	161
10.4	Hardware Manufacturing Setup	165
10.5	Experimental Results	166
10.6	Conclusion	171
	References	171
11	Conclusion	173
11.1	Future Work	175
	References	176

Material Appearance Modeling: A Data-Coherent
Approach

Dong, Y.; Lin, S.; Guo, B.

2013, X, 178 p. 96 illus., 92 illus. in color., Hardcover

ISBN: 978-3-642-35776-3
