Forewords	1
-----------------	---

INTRODUCTION

– Six Sigma ^{+Lean} – a Global Success Story Are 25 Years Enough?	7
– Six Sigma versus Lean Management – Competition?	8
– From Toolset to Mindset: What Does This Mean in Business Practice?	9
– Business Excellence as a Key for Sustainable Success	10
– Excellence Mindset in Project Work	14

DEFINE – What is the Problem?

– Summary DEFINE Phase	19
– Road Map DEFINE Phase	20
– Tool Overview DEFINE Phase	21
– Project Charter	23
– Benefit Calculation	28
– Project Frame	31
– Multi Generation Plan	33
– SIPOC	35
– Dependency Assessment	37
– Project Management	38

CONTENTS

– Work Breakdown Structure	40
– Network Plan	42
– Time Plan	44
– Resource Planning	46
– RACI Chart	48
– Budget Planning	50
– Risk Management	52
– Stakeholder Management	54
– Kick-off Meeting	57
– Project Communication	59
– Customer Needs Table	61
– Kano Model	63
– Tool 1_CTC/CTB Matrix	66
– Gate Review	69
– Gate Review DEFINE	71

MEASURE – How Big is the Problem?

– Summary MEASURE Phase	75
– Road Map MEASURE Phase	76
– Tool Overview MEASURE Phase	77
– Tool 2	79
– Collect Data	82
– Operational Definition	83

– Data Source _____	86
– Data Type _____	87
– Data Collection Forms _____	89
– Sampling Strategy _____	91
– Measurement System Analysis (MSA) _____	97
– Gage R&R for Discrete (Binary) Data _____	102
– Measurement System Analysis Type I _____	105
– Measurement System Analysis Type II _____	106
– Linearity Study and Systematic Measurement Deviations _____	108
– Test the Quality of Available Data _____	110
– Data Collection Plan _____	112
– Understanding Variation _____	114
– Pie Chart _____	115
– Bar Chart _____	116
– Pareto Chart _____	117
– Dot Plot _____	119
– Histogram _____	120
– Box Plot _____	123
– Run Chart _____	125
– Control Charts _____	128
– Scatter Plot _____	130
– Probability Plot _____	131
– Location Parameter Mean Value _____	133

CONTENTS

– Location Parameter Median	135
– Spread Parameter Variance	137
– Spread Parameter Standard Deviation	138
– Spread Parameter Range	140
– Spread Parameter Span	141
– Process Performance	142
– Defects per Million Opportunities (DPMO)	143
– Parts per Million (ppm)	145
– Defects per Unit (DPU)	146
– Yield	147
– Span, Percentile Distance	149
– Data Transformation	151
– Process Capability and Process Stability	153
– C_p and C_{pk} values	155
– Gate Review MEASURE	158

ANALYZE –

What are the Root Causes of the Problem?	159
– Summary ANALYZE Phase	161
– Road Map ANALYZE Phase	162
– Tool Overview ANALYZE Phase	163
– Cause-Effect Diagram	165
– FMEA	168

– Tool 3	175
– Process Analysis	178
– Spaghetti Diagram	182
– Process Flow Chart	184
– CFD	186
– Value Stream Map	188
– Value Analysis	191
– Time Analysis	195
– Process Efficiency	199
– Capacity Analysis	200
– Process Flow Analysis	202
– Analyze Data	204
– Data Stratification	206
– Confidence Interval	208
– Hypothesis Tests	211
– ANOVA/One Way ANOVA	217
– ANOVA/Two Way ANOVA	222
– Correlation Coefficient	226
– Simple Linear Regression	228
– Multiple Linear Regression	233
– Logistic Regression	236
– Design Of Experiments (DOE)	240
– Full Factorial Design	245

CONTENTS

– Fractional Factorial Designs	250
– Variation Reduction	254
– Response Surface Methods	256
– Further Experimental Designs	257
– Derive Main Causes	260
– Gate Review ANALYZE	263

IMPROVE –

What are the Solutions for Eliminating the Causes?

	265
– Summary IMPROVE Phase	267
– Road Map IMPROVE Phase	268
– Tool Overview IMPROVE Phase	269
– Conceive Solutions	271
– 5 S	272
– Poka Yoke	276
– Workplace Layout	280
– Theory of Constraints	282
– Setup Time Reduction	284
– Total Productive Maintenance (TPM)	288
– Generic Pull System (GPS)	294
– Replenishment Pull System (RPS)	297
– Two Bin Replenishment Pull System	300

– Determination of Batch Size	301
– Process Flow and Process Logic	302
– Brainstorming	303
– Anti-Solution Brainstorming	305
– Brainwriting	307
– SCAMPER	309
– Analogy Brainstorming	311
– Affinity Diagram	313
– Must Criteria	314
– Effort Benefit Matrix	316
– N/3 Method	317
– Nominal Group Technique	319
– Pugh Matrix	321
– Tool 4	324
– Should be Process Map	327
– Cost Benefit Analysis	329
– Prepare Process Control	331
– Reaction Plan	333
– Pilot	335
– Implementation Plan	338
– Risk Analysis	341
– Rollout	342
– Gate Review IMPROVE	343

CONTROL –

How can the Improvement's Sustainability be Ensured? _____ 345

- Summary CONTROL Phase _____ 347
- Road Map CONTROL Phase _____ 348
- Tool Overview CONTROL Phase _____ 349
- Process Documentation _____ 351
- Visual Management _____ 355
- Control Charts _____ 358
- Dashboard _____ 367
- Process Control Team _____ 370
- Glass Wall Management _____ 372
- Audits _____ 374
- Project Documentation _____ 377
- Project Closure _____ 379
- Gate Review CONTROL _____ 382
- Continuous Improvement Process _____ 383
- Lean Workout _____ 385

APPENDIX

– Abbreviations _____	389
– Index _____	392
– Process Sigma Table Including 1.5 Sigma Shift _____	399
– Bibliography _____	400

Six Sigma+Lean Toolset
Mindset for Successful Implementation of Improvement
Projects

Meran, R.; John, A.; Roenpage, O.; Staudter, C. - Lunau,
S. (Ed.)

2013, XIII, 400 p., Hardcover

ISBN: 978-3-642-35881-4
