1	Introduction	1
1.1	Molecular Heterogeneity of Complex Polymers	2
1.2	Liquid Chromatography of Polymers	6
1.3	Multidimensional Separation of Complex Polymers	10
	References	15
2	Theory of Polymer Chromatography	17
2.1	Size Exclusion Chromatography	17
2.2	Liquid Adsorption Chromatography	18
2.3	Liquid Chromatography at Critical Conditions	21
2.4	Thermodynamics of Polymer Chromatography	23
	References	25
3	Interactive Modes of Polymer Chromatography	27
3.1	Liquid Adsorption and Gradient Chromatography	28
3.2	Liquid Chromatography at Critical Conditions	30
3.3	Temperature Gradient Interaction Chromatography	32
	References	34
4	Equipment and Materials	37
4.1	Instrumental Setup	37
4.2	Stationary Phases	39
4.3	Mobile Phases	42
4.4	Detectors	42
4.4.1	Concentration Sensitive Detectors	44
4.4.2	Molar Mass Sensitive Detectors	47
4.4.3	Spectroscopic Detectors	52
	References	52
5	Multidetector Size Exclusion Chromatography	55
5.1	Analysis of Copolymers by SEC with Dual Concentration Detection	59
5.1.1	Analysis of PMMA-b-PDMA Block Copolymers by SEC with D-RI Detection	62
5.1.2	Analysis of PEO-b-PPO Block Copolymers by SEC with D-RI Detection	67

5.2	Analysis of Polymers by SEC with Molar Mass Sensitive Detection	69
5.2.1	RI-MALLS Detection	69
5.2.2	RI-Viscometer Detection	84
	References	90
6	Two-Dimensional Liquid Chromatography	95
6.1	Introduction	95
6.2	Experimental Aspects of 2D Separations	98
6.2.1	Sequence of Separation Methods	100
6.2.2	Detectability and Sensitivity in the Second Dimension	101
6.2.3	Other Experimental Factors Affecting 2D Separations	101
6.3	Separation Techniques for the First and Second Dimensions	102
6.4	Data Acquisition and Processing	105
6.5	Coupling of Gradient HPLC and SEC	107
6.5.1	Analysis of the Grafting Reaction of Methyl Methacrylate onto EPDM	110
6.5.2	Analysis of the Grafting Reaction of Styrene onto Polybutadiene	117
6.5.3	Branching Analysis of Star-Shaped Polystyrenes	121
6.6	Coupling of LCCC and SEC	130
6.6.1	Characterization of Aliphatic Polyesters	131
6.6.2	Analysis of Epoxy Resins	134
6.6.3	Characterization of Star-Shaped Polylactides	147
6.6.4	Analysis of PS-PDMS Block Copolymers	153
6.7	Other Method Combinations in 2D-LC	162
6.7.1	Analysis of Comb-Shaped PS by TGIC-Gradient HPLC	162
6.7.2	Analysis of Fatty Alcohol Ethoxylates by LCCC-LAC	167
6.8	Further Applications and Outlook	173
	References	178
7	Hyphenation of Polymer Chromatography with Information-Rich Detectors	183
7.1	Coupling with FTIR Spectroscopy	183
7.1.1	Analysis of Cross-linked Styrene-Butadiene Rubber by SEC and FTIR Spectroscopy	189
7.1.2	Fast Chemical Composition Analysis of Random Styrene-Butylacrylate Copolymers by HPLC-FTIR	197
7.2	Coupling with Mass Spectroscopy	204
7.2.1	Molar Mass Distribution of Polyester Copolymers	210
7.2.2	Molar Mass and Chemical Composition Analysis of PnBMA-b-PMMA Block Copolymers	212

7.3	Coupling with ^1H -NMR	219
7.3.1	Analysis of Octylphenyl-Terminated PEO	223
7.3.2	Analysis of Microstructure of Polystyrene	227
7.3.3	Microstructure Analysis of PI-b-PMMA Block Copolymers	233
7.4	Conclusions and Outlook	242
	References	242
8	Polyolefin Analysis by Multidimensional Liquid Chromatography	247
8.1	Coupled HT-SEC-FTIR	248
8.2	Coupled HT-SEC- ^1H -NMR	251
8.3	High-Temperature 2D Liquid Chromatography	254
8.3.1	Analysis of Polypropylenes by Tacticity and Molar Mass	260
8.3.2	Analysis of Ethylene-Vinyl Acetate Copolymers	263
8.4	Conclusions and Outlook	268
	References	269
9	Conclusions and Future Trends	273
	References	276
	Index	277

Multidimensional HPLC of Polymers

Pasch, H.; Trathnigg, B.

2013, XIV, 280 p. 181 illus., 24 illus. in color., Hardcover

ISBN: 978-3-642-36079-4
