

Contents

- 1 Credibility Theory 1**
 - 1.1 Credibility Measure 1
 - 1.2 Credibility Space 11
 - 1.3 Fuzzy Variable 13
 - 1.4 Credibility Function 16
 - 1.5 Independence 20
 - 1.6 Identical Distribution 27
 - References 29

- 2 Credibilistic Programming 31**
 - 2.1 Mathematical Programming 31
 - 2.1.1 Single-Objective Programming 32
 - 2.1.2 Multi-Objective Programming 34
 - 2.2 Credibilistic Programming 36
 - 2.3 Genetic Algorithm 39
 - 2.3.1 Representation Structure 39
 - 2.3.2 Initialization 40
 - 2.3.3 Evaluation Function 40
 - 2.3.4 Selection Process 41
 - 2.3.5 Crossover Operation 41
 - 2.3.6 Mutation Operation 42
 - 2.3.7 General Procedure 43
 - References 43

- 3 Expected Value Model 45**
 - 3.1 Expected Value 45
 - 3.2 Expected Value Model 61
 - 3.3 Fuzzy Simulation 62
 - 3.4 Applications 65
 - References 70

4	Chance-Constrained Programming Model	73
4.1	Optimistic Value	73
4.2	Pessimistic Value	82
4.3	Chance-Constrained Programming Model	91
4.4	Fuzzy Simulation	94
4.4.1	Optimistic Value Simulation	94
4.4.2	Pessimistic Value Simulation	96
4.5	Applications	98
	References	101
5	Entropy Optimization Model	103
5.1	Entropy	103
5.2	Maximum Entropy Principle	108
5.3	Entropy Optimization Model	112
5.4	Fuzzy Simulation	113
5.5	Applications	115
	References	117
6	Cross-Entropy Minimization Model	119
6.1	Cross-Entropy	119
6.2	Minimum Cross-Entropy Principle	124
6.3	Cross-Entropy Minimization Model	125
6.4	Fuzzy Simulation	125
6.5	Applications	128
	References	129
7	Regret Minimization Model	131
7.1	Distance	131
7.2	Regret Minimization Model	137
7.3	Fuzzy Simulation	138
7.4	Applications	139
	References	140
	Index	143

Credibilistic Programming

An Introduction to Models and Applications

Li, X.

2013, IX, 144 p., Hardcover

ISBN: 978-3-642-36375-7
