

Contents

1	Introduction of Electrospinning	1
1.1	Brief Introduction of Electrospinning	1
1.2	History of Electrospinning	2
1.3	Basic Electrospinning Setups and Related Theories	3
1.3.1	Basic Electrospinning Setup	3
1.3.2	Basic Phenomena in Electrospinning and Their Corresponding Theories	4
	References	12
2	Effects of Working Parameters on Electrospinning	15
2.1	Solution Parameters	15
2.1.1	Concentration	15
2.1.2	Molecular Weight	16
2.1.3	Viscosity	18
2.1.4	Surface Tension	18
2.1.5	Conductivity/Surface Charge Density	19
2.2	Processing Parameters	20
2.2.1	Voltage	20
2.2.2	Flow Rate	21
2.2.3	Collectors	21
2.2.4	Distance (H) Between the Collector and the Tip of the Syringe	23
2.3	Ambient Parameters	25
	References	27
3	Electrospun Fibers Properties	29
3.1	Fibers Direction: Modification of Electrospinning Setup	29
3.1.1	Modification of the Distance: Near-Field Electrospinning	30
3.1.2	Modification of Collectors	31
3.2	Fiber Surface Morphology Control	40
3.2.1	Pores on Surfaces	40
3.2.2	Parallel Line on Surfaces	41

3.3	Fiber Structure Control	42
3.3.1	Fiber Structure Control by Co-Electrospinning	42
3.3.2	Fiber Structure Control by Single Syringe	48
3.4	Three-Dimensional Structures Formed by Electrospun Nanofibers	66
3.4.1	3D Honeycomb Structures Formed by Electrospinning Nanofibers	66
3.4.2	3D Complex Structures Formed by Electrospinning Nanofibers	68
	References	70
4	Applications of Electrospun Nanofibers	75
4.1	Nanofiber Reinforcement	75
4.1.1	Basic Research on Nanofiber-Reinforced Composites . . .	76
4.1.2	Nanofiber-Reinforced Composites in Biomedical Application	77
4.1.3	Nanofiber-Reinforced Composites in Biodegradable Application	80
4.1.4	How to Improve the Interface Bonding Within the Electrospun-Reinforced Composites	80
4.1.5	Future Challenges	81
4.2	Filtration	81
4.2.1	Basic Research on Electrospun Nanofibers in Filtration	82
4.2.2	Antimicrobial Air Filter	85
4.2.3	Future Challenges	85
4.3	Catalysis	87
4.3.1	Chemical Catalysts	87
4.3.2	Electrochemical Catalysts	88
4.3.3	Photocatalysts	91
4.3.4	Future Challenges	94
4.4	Electronic Devices	94
4.4.1	Basic Electronic Research on Electrospun Nanostructures	95
4.4.2	Field-Effect Transistor	96
4.4.3	Chemical Sensors	99
4.4.4	Future Challenge	103
4.5	Lithium-Ion Batteries	103
4.5.1	Electrospun Nanofiber-Based Anodes	106
4.5.2	Electrospun Nanofiber-Based Cathodes	107
4.5.3	Electrospun Nanofiber-Based Separators	110
4.5.4	Future Challenge	112

4.6	Fuel Cells	112
4.6.1	Electrospun Nanofiber-Based Anode Catalyst	113
4.6.2	Electrospun Nanofiber-Based Proton Exchange Membranes	114
4.6.3	Future Challenge	115
4.7	Biomedical Field	115
4.7.1	Drug Delivery	115
4.7.2	Tissue Engineering	126
4.8	Other Applications	127
4.8.1	Template	127
4.8.2	Water Treatment	128
4.8.3	Biosensors	129
	References	130
	Author Biography	141

One-Dimensional nanostructures

Electrospinning Technique and Unique Nanofibers

Li, Z.; Wang, C.

2013, IX, 141 p. 145 illus., 55 illus. in color., Softcover

ISBN: 978-3-642-36426-6
