

# Contents

## Part I Basic Processes of Wood Formation

<b>Xylem Development in Trees: From Cambial Divisions to Mature Wood Cells . . . . .</b>	<b>3</b>
Jörg Fromm	
<b>Topochemical and Electron Microscopic Analyses on the Lignification of Individual Cell Wall Layers During Wood Formation and Secondary Changes . . . . .</b>	<b>41</b>
Gerald Koch and Uwe Schmitt	
<b>New Insights into Heartwood and Heartwood Formation . . . . .</b>	<b>71</b>
Andreas Kampe and Elisabeth Magel	

## Part II Control of Wood Formation by Endogenous and Exogenous Factors

<b>The Role of Hormones in Controlling Vascular Differentiation . . . . .</b>	<b>99</b>
Roni Aloni	
<b>Transcriptional Regulation of Wood Formation in Tree Species . . . . .</b>	<b>141</b>
Ruiqin Zhong and Zheng-Hua Ye	
<b>Climate Control of Wood Formation: Illustrated for Scots Pine at Its Northern Distribution Limit . . . . .</b>	<b>159</b>
Jeong-Wook Seo, Dieter Eckstein, Andrea Olbrich, Risto Jalkanen, Hannu Salminen, Uwe Schmitt, and Jörg Fromm	

<b>Wood Formation Under Drought Stress and Salinity . . . . .</b>	<b>187</b>
Silke Lautner	
<b>Biology, Chemistry and Structure of Tension Wood . . . . .</b>	<b>203</b>
Judith Felten and Björn Sundberg	
<b>Formation and Structure of Compression Wood . . . . .</b>	<b>225</b>
L.A. Donaldson and A.P. Singh	
<b>Index . . . . .</b>	<b>257</b>
