

Contents

Amorphous Silicon / Crystalline Silicon Heterojunction Solar Cells. . .	1
1 Introduction.	1
1.1 Basic Structure.	1
1.2 History of a-Si:H/c-Si Device Development.	3
1.3 Economic Aspects	6
2 Useful Material Parameters	7
2.1 Useful Data of Monocrystalline Silicon.	7
2.2 Useful Data of Multicrystalline Silicon	9
2.3 Useful Data of Microcrystalline Silicon.	9
2.4 Useful Data of Amorphous Silicon with Respect to Heterojunction Solar Cells	11
3 Manufacturing	14
3.1 Lapping and Polishing.	14
3.2 Texturing.	14
3.3 Cleaning	17
3.4 PECVD of i-, n-, and p-Layers.	17
3.5 TCO	19
3.6 Metallization and Screen Printing.	19
4 Concepts.	21
4.1 Conventional n a-Si:H/p c-Si Cell.	21
4.2 Bifacial a-Si:H/c-Si Heterojunction Solar Cell with Intrinsic Thin Layer, HIT Structure	22
4.3 a-Si:H/c-Si Heterocontact Cell Without i-Layer	22
4.4 Other Concepts for Improved Entrance Windows.	23
4.5 a-Si:H/c-Si Heterocontact Cell with Inverted Geometry.	23
4.6 Interdigitated HIT Cell	24
5 Problems and Challenges	25
5.1 Choice of the Base Material, Impact of the Doping, n/p Versus p/n	25
5.2 Surface States	26
5.3 Surface Passivation.	28
5.4 PECV-Deposited Emitter and Back Surface Field.	34

6	Measurement Techniques	37
6.1	Absorption, Reflection, and Transmission	37
6.2	Excess Charge Carrier Lifetime	38
6.3	Electroluminescence	49
6.4	a-Si Characterization	50
6.5	Electronic Device Characterization	55
7	Simulation.	58
7.1	AFORS-HET	59
7.2	Comparison with Experiments	60
8	Long-Term Stability and Degradation.	64
8.1	Long-Term Stability	64
8.2	Radiation Hardness	65
9	State of the Art	78
10	Silicon-Based Heterojunction Solar Cells in China.	78
10.1	Introduction of the Active Groups in this Area in China	79
10.2	Experimental Studies	80
10.3	Theoretical Simulation	94
	References	99

Amorphous Silicon / Crystalline Silicon Heterojunction
Solar Cells

Fahrner, W.R. (Ed.)

2013, XI, 111 p. 93 illus., Softcover

ISBN: 978-3-642-37038-0
