

# Contents

- 1 Background** ..... 1
  - 1.1 Multimaps ..... 1
    - 1.1.1 General Properties ..... 1
    - 1.1.2 Measurable Multifunctions and Superposition  
Multioperator ..... 5
    - 1.1.3 Single-Valued Approximations ..... 8
  - 1.2 Topological Degree ..... 12
  - 1.3 Coincidence Degree..... 18
  - 1.4 Phase Spaces ..... 22
  - 1.5 Notation ..... 24
- 2 Method of Guiding Functions in Finite-Dimensional Spaces** ..... 25
  - 2.1 Periodic Problem for a Differential Inclusion ..... 25
  - 2.2 Non-smooth Guiding Functions ..... 36
  - 2.3 Integral Guiding Functions ..... 39
  - 2.4 Generalized Periodic Problems..... 43
    - 2.4.1 Preliminaries ..... 43
    - 2.4.2 The Setting of the Problem ..... 44
    - 2.4.3 Application to Differential Games ..... 45
    - 2.4.4 Existence Theorem, Corollaries and Example ..... 46
  - 2.5 Global Bifurcation Problems ..... 50
    - 2.5.1 Abstract Result ..... 51
    - 2.5.2 Global Bifurcation of Periodic Solutions ..... 52
    - 2.5.3 Application 1: Differential Inclusion  
with a Bounded Nonlinearity ..... 63
    - 2.5.4 Application 2: Global Bifurcation for Functional  
Differential Inclusions ..... 64
    - 2.5.5 Application 3: Feedback Control System..... 65

<b>3</b>	<b>Method of Guiding Functions in Hilbert Spaces</b>	69
3.1	Integral Guiding Functions for Differential Inclusions in Hilbert Spaces	69
3.1.1	The Setting of the Problem	69
3.1.2	Existence of Periodic Solutions	72
3.1.3	Approximation Conditions	77
3.1.4	Application 1: Control Problem of a Partial Differential Equation	80
3.2	Non-smooth Guiding Functions for Functional Differential Inclusions with Infinite Delay in Hilbert Spaces	83
3.2.1	Setting of the Problem	83
3.2.2	Existence Theorem	86
3.2.3	Application: Existence of Periodic Solutions for a Gradient Functional Differential Inclusion	90
3.3	Bifurcation Problem	93
3.3.1	The Setting of the Problem	93
3.3.2	Global Bifurcation Theorem	96
3.3.3	Application 3: Ordinary Feedback Control Systems in a Hilbert Space	102
<b>4</b>	<b>Second-Order Differential Inclusions</b>	105
4.1	Existence Theorem in an One-Dimensional Space	105
4.2	Applications	110
4.2.1	Equations with Discontinuous Nonlinearities	110
4.2.2	Boundary Value Problem	113
4.2.3	A Second-Order Differential Equation	114
4.2.4	Feedback Control Systems	114
4.2.5	A Model of a Motion of a Particle in a One-Dimensional Potential	118
4.3	Existence Theorem in Hilbert Spaces	120
4.3.1	Application to a Second-Order Feedback Control System in Hilbert Space	122
4.3.2	Example	127
<b>5</b>	<b>Nonlinear Fredholm Inclusions and Applications</b>	131
5.1	Preliminaries	131
5.2	Oriented Coincidence Index	133
5.2.1	The Case of a Finite Dimensional Triplet	134
5.2.2	The Case of a Compact Triplet	138
5.2.3	Oriented Coincidence Index for Condensing Triplets	139
5.3	Calculation of the Oriented Coincidence Index by the MGF	145
5.3.1	The Main Result	145
5.3.2	Example	153

5.4	Global Bifurcation Problem .....	155
5.4.1	Abstract Result .....	155
5.4.2	Global Bifurcation for Families of Periodic Trajectories .....	158
5.4.3	Example .....	163
<b>References</b> .....		167
<b>Index</b> .....		175

Method of Guiding Functions in Problems of Nonlinear  
Analysis

Obukhovskii, V.; Zecca, P.; Van Loi, N.; Kornev, S.

2013, XIII, 177 p., Softcover

ISBN: 978-3-642-37069-4
