1	Introduction	1
1.1	Progresses in Controllable Synthesis of CNTs	1
1.2	Progresses in Understanding CNTs Growth Mechanisms	4
1.3	Progresses in CNTs-Based Nano-Electronic Devices	8
1.3.1	CNTs as One-Dimensional Metallic Wires	9
1.3.2	CNTs as Semiconductors	10
1.4	Progresses of In Situ TEM Studies of CNTs	10
1.4.1	Studying CNTs Growth Mechanism by Using In Situ TEM	11
1.4.2	Properties Measurement by Using In Situ TEM	13
1.4.3	Studying Structural Evolution of CNTs by Using In Situ TEM	14
1.4.4	Fabrication of CNTs-Based Nanodevices by Using In Situ TEM	15
1.5	Motivations of the Thesis	16
	References	17
2	In Situ TEM Method and Materials	23
2.1	Interactions Between Electrons and Materials	23
2.1.1	Elastic Interactions	24
2.1.2	Inelastic Interactions	24
2.2	TEM-SPM In Situ Platform	25
2.3	First Principles Calculations	28
2.4	Design and Fabrication of Samples for In Situ TEM	28
2.4.1	CVD Method	29
2.4.2	AAO Template Method	30
2.5	Summary	33
	References	34

3	Studying Nucleation Mechanism of Carbon Nanotubes by Using In Situ TEM	37
3.1	Research Background	37
3.1.1	CNTs Growth Mechanism on Traditional Fe Group Metals	37
3.1.2	CNTs Growth Mechanism on Newly Developed Metal Catalysts	38
3.1.3	CNTs Growth Mechanism on Recently Discovered Metal-Free Catalysts	38
3.2	Experimental Design of MWCNT Nano-Furnaces for In Situ Observations	39
3.3	Investigations of CNTs Nucleation Mechanism on SiO _x Catalysts Using In Situ TEM	41
3.3.1	Surface Diffusion of Carbon and Lift-Up of Carbon Shells	41
3.3.2	Nucleation of SWCNTs on Small SiO _x Nanoparticles	41
3.3.3	High Temperature Transformation of Large SiO _x Nanoparticles	42
3.4	General Requirements for the Catalysts Used for CNTs Growth	44
3.5	CNTs Growth from All-Carbon Growth Seeds	45
3.5.1	Structural Evolutions of Carbon Microfibers Under High Currents	45
3.5.2	Formation Mechanism of CNTs from Carbon Microfibers	46
3.6	Heteroepitaxial Growth of CNTs	48
3.6.1	Preparation of BN Nanofiber Seeds	48
3.6.2	Growth of SWCNTs from BN Nanofiber Seeds	49
3.6.3	Growth Mechanism of CNTs from BN Nanofibers	50
3.7	Summary	51
	References	52
4	Fabrication and Property Investigation of Carbon Nanotube-Clamped Metal Atomic Chains	55
4.1	Research Background	55
4.1.1	Fabrication Methods for MACs	55
4.1.2	Structures and Properties of MACs	56
4.1.3	Nanodevices Based on MACs	56
4.2	Design and Fabrication of CNT-Clamped MACs	57
4.2.1	Formation Processes of Fe Atomic Chains	57
4.2.2	Formation Mechanism of Fe Atomic Chains	61
4.3	Electronic Structures of CNT-Clamped Fe Atomic Chains	62
4.4	In Situ Measurements of the Electrical Properties of CNT-Clamped Fe Atomic Chains	63
4.4.1	Annealing and its Effect on the Electrical Properties of the Fe-Filled CNTs	63

4.4.2	Quantized Conductance of CNT-Clamped Fe Atomic Chains	63
4.4.3	Current–Voltage Characteristics of CNT-Clamped Fe Atomic Chains	65
4.5	CNT-Clamped MACs of Other Metals.	66
4.5.1	Fabrication of CNT-Clamped MACs of Fe Alloy and Pt	66
4.5.2	First Principles Calculations of CNT-Clamped Pt, Co Atomic Chains	68
4.6	Summary	69
	References	70
5	Conclusions and Perspective	73
5.1	Conclusions	73
5.2	Perspective for Future Works	74

In Situ Transmission Electron Microscopy Studies of
Carbon Nanotube Nucleation Mechanism and Carbon
Nanotube-Clamped Metal Atomic Chains

Tang, D.-M.

2013, XV, 74 p. 44 illus., 17 illus. in color., Hardcover
