1	Strongly Interacting Matter in Magnetic Fields: A Guide to This Volume	1
	Dmitri E. Kharzeev, Karl Landsteiner, Andreas Schmitt, and Ho-Ung Yee	
1.1	Introduction	1
1.2	Chiral Magnetic Effect and Anomaly-Induced Transport	2
1.3	Phase Structure in a Magnetic Field	5
1.3.1	Phases of QCD in a Magnetic Field	5
1.3.2	Condensed Matter Systems in a Magnetic Field via AdS/CFT	8
	References	11
2	Magnetic Catalysis: A Review	13
	Igor A. Shovkovy	
2.1	Introduction	13
2.2	The Essence of Magnetic Catalysis	15
2.2.1	Dimensional Reduction in a Magnetic Field	15
2.2.2	Magnetic Catalysis in $2 + 1$ Dimensions	19
2.2.3	Magnetic Catalysis in $3 + 1$ Dimensions	22
2.2.4	Symmetry Breaking as Bound State Problem	23
2.2.5	Analogy with Superconductivity	26
2.2.6	Bound States in Lower Dimensions	27
2.3	Magnetic Catalysis in Gauge Theories	29
2.3.1	Magnetic Catalysis in QED	29
2.3.2	Magnetic Catalysis in QCD	31
2.3.3	Magnetic Catalysis in Graphene	33
2.4	Concluding Remarks	37
	Appendix Fermion Propagator in a Magnetic Field	38
	References	41
3	Inverse Magnetic Catalysis in Field Theory and Gauge-Gravity Duality	51
	Florian Preis, Anton Rebhan, and Andreas Schmitt	

3.1	Introduction	51
3.2	Chiral Phase Transition in the Nambu–Jona-Lasinio Model	54
3.2.1	Chiral Symmetry Breaking Without External Fields	55
3.2.2	Chiral Symmetry Breaking in the Presence of a Magnetic Field	59
3.3	Chiral Phase Transition in the Sakai–Sugimoto Model	67
3.3.1	Introducing the Model	67
3.3.2	Equations of Motion and Axial Current	71
3.3.3	Semianalytic Solution to the Equations of Motion	73
3.3.4	Broken Chiral Symmetry	75
3.3.5	Symmetric Phase	76
3.3.6	Chiral Phase Transition	78
3.4	Discussion	82
	References	83
4	Quark Matter in a Strong Magnetic Background	87
	Raoul Gatto and Marco Ruggieri	
4.1	Introduction	87
4.2	The PNJL Model with a Magnetic Background	89
4.2.1	The One-Loop Quark Propagator	90
4.2.2	The One-Loop Thermodynamic Potential	92
4.3	Numerical Results	93
4.3.1	Condensates and Dressed Polyakov Loop	94
4.3.2	Entanglement of NJL Coupling and Polyakov Loop	97
4.4	Phase Diagram in the eB – T Plane	100
4.4.1	Comparison with Other Computations	101
4.5	Polarization of the Quark Condensate	102
4.5.1	Non-renormalized Quark-Meson Model Results	105
4.5.2	Results Within the Renormalized QM Model	109
4.6	Conclusions	114
	References	116
5	Thermal Chiral and Deconfining Transitions in the Presence of a Magnetic Background	121
	Eduardo S. Fraga	
5.1	Introduction	121
