Part I Fundamentals

1 Attosecond Science	3
P.B. Corkum	
References	7

Part II Generation, Control and Characterization of Attosecond Pulses

2 Theory of Attosecond Pulse Generation	11
Mette B. Gaarde and Kenneth J. Schafer	
2.1 Introduction	11
2.2 Single Atom Response	14
2.2.1 Numerical Solution of the TDSE	15
2.2.2 Solution of the TDSE Within the Strong Field Approximation	17
2.2.3 Time-Dependent Ionization Probability	18
2.3 Macroscopic Response	19
2.3.1 Numerical Solution of the Propagation Equation	24
2.4 Summary and Outlook	28
References	28
3 Perspectives for the Generation of Intense Isolated Attosecond Pulses at Ultra-high Laser Intensities	33
J.A. Pérez-Hernández and L. Roso	
3.1 Introduction	33
3.2 Attosecond Pulses Production via High-Order Harmonic Generation	34
3.2.1 Trajectory Analysis	34
3.2.2 Behavior of the Harmonic Yield: Valley Structure	37
3.2.3 Harmonic Spectrum and Attosecond Pulses	38
3.3 Ionization Gating	42

3.4	Summary	43
	References	45
4	Generation of Isolated Attosecond Pulses	47
	Eiji J. Takahashi, Pengfei Lan, and Katsumi Midorikawa	
4.1	Introduction	47
4.2	Essential Conditions of a Driving Laser Field for Creating IAPs . .	48
4.3	Few-Cycle Laser Field with CEP Stabilization	49
4.4	Polarization Gating and Interference Polarization Gating	50
	4.4.1 Conventional Polarization Gating	51
	4.4.2 Interference Polarization Gating	52
4.5	Ionization Gating	53
	4.5.1 Ionization Gating Induced by Single Atomic Response . . .	54
	4.5.2 Ionization Gating Induced by Macroscopic Effects	56
4.6	Two-Color Gating Method	57
	4.6.1 Two-Color Field Synthesis (800 nm + 400 nm, Parallel Polarization)	57
	4.6.2 Double Optical Gating, Generalized Double Optical Gating	59
	4.6.3 IR Two-Color Field Synthesis and IR Double Optical Gating	62
4.7	Other Methods	65
4.8	Summary—Generation of High-Power IAPs	66
	References	67
5	Attosecond Pulse Characterization	69
	F. Calegari, M. Lucchini, G. Sansone, S. Stagira, C. Vozzi, and M. Nisoli	
5.1	Introduction	69
5.2	Attosecond Streak-Camera Methods	70
	5.2.1 Experimental Results	74
5.3	Novel Temporal Characterization Techniques	75
	5.3.1 Phase Retrieval by Omega Oscillation Filtering (PROOF) .	76
5.4	Attosecond Metrology by XUV Nonlinear Optics	77
5.5	Conclusions	79
	References	80
6	Strong-Field and Attosecond Physics with Mid-infrared Lasers . . .	81
	Anthony D. DiChiara, Shambhu Ghmire, David A. Reis, Louis F. DiMauro, and Pierre Agostini	
6.1	Introduction	81
6.2	Laser Technology: State-of-the-Art and Perspectives	82
	6.2.1 The 3.2–3.9 μm Laser System	82
	6.2.2 The 1.3–2.0 μm Laser System	84
6.3	Photo-ionization and HHG at Long Laser Wavelengths	84
	6.3.1 Tunnel Ionization and ATI in the Recollision Model	84
	6.3.2 Non-sequential Ionization with a 3.6 μm Laser Field	86

6.4	HHG and Attosecond Generation at MIR Wavelengths	88
6.4.1	Harmonic Yield	89
6.4.2	HHG Cutoff and Frequency Content	90
6.4.3	Spectral Phase Measurements	91
6.4.4	Attosecond Beam Line and RABBITT Measurements	93
6.5	Exploration of HHG by Liquids and Crystals	94
6.5.1	Harmonics Generated in Liquids	94
6.5.2	Harmonic Generation in a Perfect ZnO Crystal	95
6.6	Conclusion and Outlook	95
	References	97

Part III Attosecond Measurements and Control of Physical Systems

7	Strong Field Ionization in a Multi-color Field	101
	T. Balciunas, A.J. Verhoef, S. Haessler, A.V. Mitrofanov, G. Fan, E.E. Serebryannikov, M.Y. Ivanov, A.M. Zheltikov, and A. Baltuska	
7.1	Introduction	102
7.2	Strong-Field Ionization	103
7.2.1	Semiclassical Model of Electron Emission and Sideband Generation in a Two-Color Field	106
7.2.2	Quantum Mechanical Treatment of Brunel Emission	107
7.3	High-Frequency Sidebands in Gas Targets	108
7.4	High-Frequency Sidebands in Bulk Dielectrics	109
7.5	Low Frequency Sideband Generation from Gas	111
