

Contents

- 1 Introduction** 1
 - 1.1 Deductive Decision-Making 3
 - 1.2 Target Users 4
 - 1.3 Drawbacks of Existing Solutions 5
 - 1.3.1 Spreadsheets 5
 - 1.3.2 Logic Programming 6
 - 1.3.3 Databases 9
 - 1.3.4 Task-Specific Tools 10
 - 1.4 Approach 10
 - 1.4.1 The Deductive Engine 11
 - 1.4.2 The User Interface 13
 - 1.5 A More Elaborate Example 14
 - 1.6 Related Work 17
 - 1.6.1 Logics and Spreadsheets 18
 - 1.6.2 Beyond Logical Spreadsheets 20
 - 1.7 Work Plan 22
- 2 Requirements** 25
 - 2.1 Functional Requirements 25
 - 2.2 Cognitive Requirements 28
 - 2.3 Evaluation 30

Part I Deductive Engine

- 3 The Traditional Spreadsheet** 33
 - 3.1 Spreadsheet Model 33
 - 3.2 Evaluation 37
 - 3.2.1 Naïve Strategy 37
 - 3.2.2 Elements of Fixpoint Theory 39
 - 3.2.3 Dependency Graph 43
 - 3.3 Updates 49

3.4	Explanation	53
3.5	Summary	53
4	The Relational Spreadsheet	55
4.1	Arrays	55
4.1.1	Generic Arrays	57
4.1.2	Spreadsheet Arrays	58
4.1.3	Array Operators	59
4.1.4	Array Formulas	60
4.1.5	Component Expressions	60
4.1.6	Spreadsheets with Arrays	62
4.1.7	Arrays Versus Scalars	64
4.2	Relational Support in the Traditional Spreadsheet	64
4.3	Extending Spreadsheets with First-Class Relations	66
4.3.1	Formalizing Relations	67
4.3.2	Relational Operators and Expressions	71
4.3.3	Relational Spreadsheets	85
4.3.4	Relational Spreadsheets Versus Relational Databases	91
4.4	Evaluation	95
4.4.1	Cost	95
4.4.2	Naïve Evaluation	98
4.4.3	Dependency Graph	102
4.4.4	Semi-naïve Evaluation	106
4.5	Updates	108
4.5.1	Relation-Level Updates	108
4.5.2	Incremental Updates of Relations	110
4.5.3	Recalculation Policies	114
4.6	Explanation	115
4.7	Summary	116
5	The Logical Spreadsheet	119
5.1	A First-Order Logic Refresher	120
5.1.1	Syntax	120
5.1.2	Model Theory	122
5.1.3	Proof Theory	122
5.2	The Logic of the Relational Spreadsheet	123
5.2.1	Relational Substrate	124
5.2.2	Relational Algebra as Logic	127
5.2.3	Stratification	135
5.3	Inference in a Definite Spreadsheet Theory	139
5.3.1	Non-recursive Definite Theories	139
5.3.2	Herbrand Models	143
5.3.3	Fixpoint Characterization	144
5.3.4	Computing Fixpoints	145
5.3.5	Proof Theory	148

5.4	Inference in a Normal Spreadsheet Theory	154
5.4.1	Non-recursive Normal Theories	154
5.4.2	Model Theory	157
5.4.3	Proof Theory	160
5.5	Spreadsheet Evaluation Revisited	163
5.6	Updates Revisited	168
5.6.1	Positive Update of Positive Literals	168
5.6.2	Negative Update of Positive Literals	172
5.6.3	Updates to Negative Literals	174
5.6.4	Update Propagation in a Normal Theory	176
5.7	Explanation Revisited	177
5.7.1	Positive Explanation	178
5.7.2	Negative Explanation	179
5.7.3	Integrated Explanation	180
5.8	Summary	180
6	The Deductive Spreadsheet	183
6.1	Spreadsheets with Recursive Definitions	184
6.1.1	Transitive Closure	184
6.1.2	Expressing Extensional Universal Quantification	186
6.1.3	Combining Deductive and Functional Computation	189
6.1.4	Limitations	191
6.2	Recursive Spreadsheet Theories	192
6.2.1	Syntax and Basic Definitions	192
6.2.2	Fixpoint Semantics and Evaluation	198
6.2.3	Bottom-Up Derivation and Updates	206
6.2.4	Top-Down Derivation and Explanation	208
6.2.5	Historical Perspective	211
6.2.6	Relational Counterpart and Relative Expressiveness	213
6.3	Bounded Termination	217
6.3.1	Head Constraints in Recursive Clauses	217
6.3.2	Lists	221
6.3.3	Irrelevant Terms	229
6.4	Additional Examples	230
6.4.1	Abbreviated Forms	231
6.4.2	More Transitive Closure Problems	234
6.4.3	Bill of Materials Problem	236
6.4.4	Workflow Problem	237
6.4.5	Scheduling Problem	239
6.4.6	Anti-trust Control Problem	240
6.5	Extensions	241
6.5.1	Embedded Implication	242
6.5.2	Complex Objects	249
6.5.3	Typing	250
6.6	Summary	250

Part II User Interface

7	The Traditional Interface	255
7.1	Layout.....	260
7.1.1	Cells, Worksheets, and Workbooks	260
7.1.2	Formatting Within a Cell	263
7.1.3	Formatting Within a Worksheet.....	264
7.2	Formulas	265
7.2.1	Scalar Formulas	266
7.2.2	Array Formulas	268
7.2.3	Graphical Construction of Formulas.....	269
7.2.4	Copy and Paste of Formulas	272
7.3	Controlling Evaluation	274
7.3.1	Updates.....	274
7.3.2	Explanation	275
7.4	Productivity Facilities	277
7.5	Summary.....	277
8	Cognitive Interface Design	279
8.1	Interface Usability Evaluation	280
8.1.1	User Testing.....	280
8.1.2	Predictive User Models.....	281
8.1.3	Lightweight Approximate Methods	283
8.2	Cognitive Dimensions of Notation	283
8.2.1	Discussion Tools for Visual Languages	284
8.2.2	Principal Cognitive Dimensions	285
8.3	Attention Investment Model	293
8.3.1	Overview	294
8.3.2	Attention Investment Analysis of the Deductive Spreadsheet	294
8.3.3	Integration with the Cognitive Dimensions Model	296
8.4	Target Audience	296
8.5	Summary.....	298
9	Toward a Deductive Interface	299
9.1	Deductive Layout.....	300
9.1.1	Defining Relations	300
9.1.2	The Formula Input Textbox	306
9.1.3	Further Considerations	307
9.2	Textual Input of Clausal Theories	309
9.2.1	Base Relations and Predicate Names	310
9.2.2	Logical Syntax of Clauses.....	312
9.2.3	Relational Syntax of Clauses.....	319
9.2.4	Handling and Preventing Errors	322
9.2.5	Integrating Logical Formulas and Traditional Expressions	324

9.3	Graphical Construction of Clausal Theories	325
9.3.1	Mouse-Assisted Clause Definition	326
9.3.2	Dialog-Assisted Clause Definition	330
9.3.3	Copy and Paste	333
9.4	Updates	335
9.4.1	Altering the Geometry of a Relation	335
9.4.2	Cut, Copy and Paste Across Clausal Definitions	338
9.4.3	Controlling Evaluation	338
9.5	Debugging	340
9.6	Productivity Tools	343
9.7	Getting Help	344
9.8	Summary	345
10	Preliminary Experiments	347
10.1	Outline of the Experiment	347
10.1.1	User Background	348
10.1.2	Illustration of the Deductive Spreadsheet	349
10.1.3	Exposure to the User Interface	353
10.2	Tested Users	353
10.3	Results of the Experiments	355
10.3.1	Advanced Users	355
10.3.2	Intermediate Users	356
10.3.3	Beginners	356
10.4	Summary	357
11	Future Developments	365
11.1	Prototyping	365
11.1.1	Strategies	366
11.1.2	Pre-prototyping	367
11.2	Experimental Assessment	369
11.3	Functional Extensions	370
11.3.1	Technical Challenges	371
11.3.2	Extensions	371
11.4	Interface Extensions	372
11.4.1	Cognitive Challenges	372
11.4.2	Extensions	374
	Annotated Bibliography	375
	Symbols in Use	395
	Index	401
