

Contents

Part I Epidemic Modeling

1	An Introduction to Epidemic Modeling	3
1.1	Categorical Models	4
2	Simple Epidemics and SIS Models	9
2.1	Introduction	9
2.2	The First Model: A Simple Epidemic	9
2.3	A Full SIS Model	12
2.4	Steady State	14
2.5	Computational Implementation	15
3	SIR	17
3.1	Introduction	17
3.2	The SIR Model	17
3.2.1	Dynamics	18
3.3	Epidemic Threshold and Steady States	19
3.4	Computational Analysis	20
3.5	Herd Immunity	23
3.6	Non-Constant Populations	24

Part II Merging Economics and Epidemiology

4	Economic Modeling and Epidemiology	31
4.1	Economic Utility	31
4.2	Utility and Epidemic Modeling	32
4.3	The Economics of Prevention	33
4.3.1	Individual Prevention Decisions	34
4.3.2	Public Prevention Decisions	34
4.3.3	Costs and Benefits of Public Health Decisions	37
	Reference	39

5 Econometrics and Epidemiology	41
--	-----------

Part III An Introduction to Social Interactions

6 Interaction Networks: An Introduction	47
6.1 Network Properties	49
6.2 Characteristic Path Length	50
6.3 Clustering	53
6.4 Centrality	55
6.4.1 Measuring Centrality	58
6.5 Degree Distribution	59
6.5.1 Who Has More Friends?	61
6.6 Dynamic Networks	63
References	65

Part IV Strategic Decision Making

7 Strategic Public Health Interventions	69
7.1 Purposeful Behavior.	70
7.1.1 Varying Risk	70
7.1.2 Varying Risk Tolerance	72
7.1.3 Targeted Intervention	75
References	77
8 Strategic Individual Decision Making	79
8.1 A Brief Introduction to Game Theory	79
8.1.1 Classes of 2×2 Games	81
8.2 A Vaccination Game	84
8.3 Peer Effects	89
9 Conclusion	93
Reference	94
