

Contents

Optimization Approaches to Security-Constrained Unit Commitment and Economic Dispatch with Uncertainty Analysis	1
Dzung T. Phan and Ali Koc	
Homeostatic Control and the Smart Grid: Applying Lessons from Biology	39
Martin Beckerman	
Operator’s Interruption-Cost-Based Sectionalization Method for 3-Feeder Radial Distribution Architecture	53
Virginijus Radziukynas, Neringa Radziukynienė, Arturas Klementavičius and Darius Naujokaitis	
The Role of Flexible Demands in Smart Energy Systems	79
Kristin Dietrich, Jesus M. Latorre, Luis Olmos and Andres Ramos	
Smart Grid Tamper Detection Using Learned Event Patterns.	99
William L. Sousan, Qiuming Zhu, Robin Gandhi and William Mahoney	
Automating Electric Substations Using IEC 61850	117
Peter J. Hawrylak, Jeyasingam Nivethan and Mauricio Papa	
Phasor Measurement Unit and Phasor Data Concentrator Cyber Security	141
Thomas H. Morris, Shengyi Pan, Uttam Adhikari, Nicolas Younan, Roger King and Vahid Madani	
Infrastructure Security for Smart Electric Grids: A Survey	161
Naran M. Pindoriya, Dipankar Dasgupta, Dipti Srinivasan and Marco Carvalho	

**Known Secure Sensor Measurements Concept and Its Application
for Critical Infrastructure Systems 181**
Annarita Giani, Ondrej Linda, Milos Manic and Miles McQueen

**Data Diodes in Support of Trustworthy Cyber Infrastructure
and Net-Centric Cyber Decision Support 203**
H. Okhravi, F. T. Sheldon and J. Haines

Index 217

Optimization and Security Challenges in Smart Power
Grids

Pappu, V.; Carvalho, M.; Pardalos, P.M. (Eds.)

2013, VIII, 220 p. 49 illus., Hardcover

ISBN: 978-3-642-38133-1
