

Contents

- 1 Introduction 1**
 - 1.1 Unified Model for the Eigenvalue Densities 1
 - 1.2 String Equation and Matrix Models 5
 - 1.3 Critical Point in Gross-Witten Model 10
 - 1.4 Phase Transitions in the Momentum Aspect 13
 - References 18
- 2 Densities in Hermitian Matrix Models 21**
 - 2.1 Generalized Hermite Polynomials 21
 - 2.2 Integrable System and String Equation 25
 - 2.3 Factorization and Asymptotics 30
 - 2.4 Density Models 37
 - 2.5 Special Densities 42
 - References 44
- 3 Bifurcation Transitions and Expansions 45**
 - 3.1 Free Energy for the One-Interval Case 45
 - 3.2 Partition Function and Toda Lattice 52
 - 3.3 Merged and Split Densities 55
 - 3.4 Third-Order Phase Transition by the ε -Expansion 59
 - 3.5 Symmetric Cases 68
 - References 73
- 4 Large-N Transitions and Critical Phenomena 75**
 - 4.1 Cubic Potential 75
 - 4.1.1 Models in Large-N Asymptotics 75
 - 4.1.2 First-Order Discontinuity 78
 - 4.1.3 Fifth-Order Phase Transition 83
 - 4.2 Quartic Potential 86
 - 4.2.1 Second-Order Transition 87
 - 4.2.2 Critical Phenomenon 88
 - 4.3 General Quartic Potential 91

4.3.1	Density Model with Discrete Parameter	91
4.3.2	Expansion for the Generalized Model	94
4.3.3	Double Scaling at the Critical Point	98
4.4	Searching for Fourth-Order Discontinuity	101
	References	105
5	Densities in Unitary Matrix Models	107
5.1	Variational Equation	107
5.2	Recursion and Discrete AKNS-ZS System	110
5.3	Lax Pair and String Equation	113
5.3.1	Special Potential	113
5.3.2	General Potential	120
5.4	Densities Reduced from the Lax Pair	124
5.4.1	Strong Couplings: General Case	126
5.4.2	Weak Couplings: One-Cut Cases	126
5.4.3	Weak Coupling: Two-Cut Case	127
5.4.4	Weak Coupling: Three-Cut Case	129
	References	130
6	Transitions in the Unitary Matrix Models	131
6.1	Large-N Models and Partition Function	131
6.2	First-Order Discontinuity with Two Cuts	135
6.3	Double Scaling Associated with Gross-Witten Transition	140
6.4	Third-Order Transitions for the Multi-cut Cases	148
6.5	Divergences for the One-Cut Cases	154
	References	158
7	Marcenko-Pastur Distribution and McKay's Law	161
7.1	Laguerre Polynomials and Densities	161
7.2	Divergences Related to Marcenko-Pastur Distribution	167
7.3	Jacobi Polynomials and Logarithmic Divergences	176
7.4	Integral Transforms for the Density Functions	183
	References	187
	Appendix A Some Integral Formulas	191
	Appendix B Properties of the Elliptic Integrals	195
	B.1 Asymptotics of the Elliptic Integrals	195
	B.2 Elliptic Integrals Associated with Legendre's Relation	197
	Appendix C Lax Pairs Based on the Potentials	203
	C.1 Cubic Potential	203
	C.2 Quartic Potential	205
	C.3 Potential in the Unitary Model	206
	Appendix D Hypergeometric-Type Differential Equations	211
	D.1 Singular Points in the Hermitian Model	211
	D.2 Singular Points in the Unitary Model	213
	Index	217

Application of Integrable Systems to Phase Transitions

Wang, C.B.

2013, X, 219 p., Hardcover

ISBN: 978-3-642-38564-3
