1	Introduction	1
	References	6
2	Synthesis of Ti-MWW Zeolite	9
2.1	Introduction	9
2.2	Boron-Containing Ti-MWW Synthesis	12
2.3	Boron-Less Ti-MWW Synthesis	18
2.3.1	Synthesis of Ti-MWW Using Linear-Type Quaternary Alkylammonium Hydroxides	18
2.3.2	Synthesis of Ti-MWW by a Dry-Gel Conversion Method	19
2.3.3	Synthesis of Ti-MWW with the Assistant of F^- Ions	23
2.4	Boron-Free Ti-MWW Synthesis	26
2.4.1	Synthesis of Ti-MWW with Dual Structure-Directing Agents	26
2.4.2	Synthesis of B-Free Ti-MWW Through Reversible Structure Conversion	30
	References	32
3	Structural Modification of Ti-MWW: A Door to Diversity	35
3.1	Introduction	35
3.2	Structural Conversion to Enhance the Hydrophobicity	37
3.3	Swelling and Full Delamination of Ti-MWW	41
3.4	Partial Delamination of Ti-MWW	44
3.5	Pillaring of Ti-MWW	50
3.5.1	Interlayer Silylation of Ti-MWW	52
3.5.2	Synthesis of Ti Containing Interlayer Expanded MWW Structure Via a Combination of Silylation and Ti Insertion	57
	References	60

4	Catalytic Properties of Ti-MWW in Selective Oxidation Reactions	63
4.1	Overview	63
4.2	Epoxidation of Alkenes over Ti-MWW	64
4.2.1	Epoxidation of Propylene over Ti-MWW.	65
4.2.2	Unique Trans-Selectivity of Ti-MWW in Epoxidation of Cis/Trans-Alkenes with Hydrogen Peroxide	68
4.2.3	Selective Liquid-Phase Oxidation of Cyclopentene Over Ti-MWW	72
4.2.4	Highly Efficient and Selective Production of Glycidol Through Epoxidation of Allyl Alcohol with H ₂ O ₂	74
4.2.5	Selective Epoxidation of Diallyl Ether with H ₂ O ₂	78
4.2.6	Epoxidation of 2,5-Dihydrofuran to 3,4-Epoxytetrahydrofuran	82
4.2.7	Selective Production of Epichlorohydrin Through Epoxidation of Allyl Chloride	85
4.3	Ammonoximation of Ketones and Aldehydes	88
4.3.1	Ammonoximation of Methyl Ethyl Ketone	88
4.3.2	Ammonoximation of Cyclohexanone	92
4.3.3	Ammonoximation of Cyclohexanone in a Continuous Slurry Reactor	95
4.3.4	Cyclohexanone Ammonoximation with Core-Shell Structured Ti-MWW@meso-SiO ₂	99
4.4	Unique Catalytic Properties of Fluorine-Planted Ti-MWW	103
4.5	Oxidation of Amines, 1,4-Dioxane, Sulfides and Olefinic Alcohols	106
4.5.1	Oxidation of Pyridines.	106
4.5.2	Oxidation of 1,4-Dioxane.	109
4.5.3	Oxidative Desulfurization with Ti-MWW	111
4.5.4	Epoxidation and Cyclization of Olefinic Alcohols.	112
4.6	Selective Epoxidation of Propylene to PO with H ₂ and O ₂ Over Bifunctional Au/Ti-MWW Catalyst	114
	References	119
5	Conclusions and Prospects	125

MWW-Type Titanosilicate

Synthesis, Structural Modification and Catalytic

Applications to Green Oxidations

Wu, P.; Xu, H.; Xu, L.; Liu, Y.; He, M.

2013, VIII, 125 p. 79 illus., 25 illus. in color., Softcover
