

Contents

1	The Haagerup Property for Discrete Measured Groupoids	1
	Claire Anantharaman-Delaroche	
1.1	Introduction	1
1.2	The von Neumann Algebra of a Measured Groupoid	3
1.3	Basic Facts on the Module $L^2(M)_A$	7
1.4	From Completely Positive Maps to Positive Definite Functions	12
1.5	From Positive Definite Functions to Completely Positive Maps	17
1.6	Characterizations of the Relative Haagerup Property	20
1.7	Treeable Countable Measured Groupoids Have Property (H)	24
1.8	Properties (T) and (H) Are Not Compatible	27
	References	28
2	Do Phantom Cuntz-Krieger Algebras Exist?	31
	Sara E. Arklint	
2.1	Introduction	31
2.2	Special Cases	33
2.3	Using Filtered K -Theory	34
2.4	Summary	39
	References	39
3	Projective Dimension in Filtrated K-Theory	41
	Rasmus Bentmann	
3.1	Introduction	41
3.2	Statement of Results	42
3.3	Preliminaries	44
3.4	Proof of Proposition 1	46
3.5	Free Resolutions for $\mathcal{N}\mathcal{T}_{ss}$	46
3.6	Tensor Products with Free Right-Modules	47
3.7	Proof of Proposition 2	48
3.8	Proof of Proposition 3	54
3.9	Proof of Proposition 4	55

3.10	Cuntz-Krieger Algebras with Projective Dimension 2	58
	References	61
4	An Introduction to the C^*-Algebra of a One-Sided Shift Space	63
	Toke Meier Carlsen	
4.1	Introduction	63
4.2	Representations of One-Sided Shift Spaces	64
4.3	The C^* -Algebra of a One-Sided Shift Space	69
4.4	The Gauge Action	72
4.5	One-Sided Conjugation	75
4.6	Two-Sided Conjugacy and Flow Equivalence	78
4.7	The K -Theory of C^* -Algebras Associated to Shift Spaces	78
	References	86
5	Classification of Graph C^*-Algebras with No More than Four Primitive Ideals	89
	Søren Eilers, Gunnar Restorff, and Efren Ruiz	
5.1	Introduction	89
5.2	General Theory	96
5.3	Fan Spaces	98
5.4	A Pullback Technique	110
5.5	Ad Hoc Methods	113
5.6	Summary of Results	121
	References	128
6	Remarks on the Pimsner-Voiculescu Embedding	131
	George A. Elliott and Zhuang Niu	
6.1	Introduction	131
6.2	C^* -Blends and C^* -Alloys	133
6.3	Irrational Extended Rotation Algebras are C^* -Alloys	133
	References	140
7	Graph C^*-Algebras with a T_1 Primitive Ideal Space	141
	James Gabe	
7.1	Introduction	141
7.2	Preliminaries	142
7.3	T_1 Primitive Ideal Space	146
7.4	Clopen Maximal Gauge-Invariant Ideals	150
	References	156
8	The Law of Large Numbers for the Free Multiplicative Convolution	157
	Uffe Haagerup and Søren Möller	
8.1	Introduction	158
8.2	Preliminaries	159
8.3	Proof of the Main Result	161

8.4	Further Formulas for the S -Transform	165
8.5	Examples	174
	References	185
9	Is Every Irreducible Shift of Finite Type Flow Equivalent to a Renewal System?	187
	Rune Johansen	
9.1	Introduction	187
9.2	Fischer Covers of Renewal Systems	190
9.3	Entropy and Flow Equivalence	195
9.4	Towards the Range of the Bowen–Franks Invariant	202
	References	209
10	On the Grothendieck Theorem for Jointly Completely Bounded Bilinear Forms	211
	Tim de Laat	
10.1	Introduction	211
10.2	Bilinear Forms on Operator Spaces	213
10.3	KMS States on Cuntz Algebras	214
10.4	Proof of the JCB Grothendieck Theorem	216
10.5	The Best Constant	218
10.6	A Remark on Blecher’s Inequality	219
	References	220
11	C^*-Algebras Associated with a-adic Numbers	223
	Tron Omland	
11.1	Introduction	223
11.2	The a -adic Numbers	225
11.3	The a -adic Algebras	228
11.4	The a -Adic Duality Theorem	231
11.5	Invariants and Isomorphism Results	234
11.6	The “Unstabilized” a -Adic Algebras	236
	References	238
12	The Structure of Stacey Crossed Products by Endomorphisms	239
	Eduard Ortega and Enrique Pardo	
12.1	Introduction	239
12.2	Simple Stacey Crossed Product	241
12.3	Purely Infinite Simple Crossed Products	246
	References	250
13	Quasi-symmetric Group Algebras and C^*-Completions of Hecke Algebras	253
	Rui Palma	
13.1	Introduction	253
13.2	Preliminaries	255
13.3	Quasi-symmetric Group Algebras	262

13.4	Further Remarks on Groups with a Quasi-symmetric Group Algebra.....	264
13.5	Hall's Equivalence	266
13.6	A Counter-Example	267
	References.....	270
14	Dynamics, Wavelets, Commutants and Transfer Operators Satisfying Crossed Product Type Commutation Relations	273
	Sergei Silvestrov	
14.1	Introduction.....	273
14.2	Wavelet Representations, Solenoids and Symbolic Dynamics	278
14.3	Commutants and Reducibility of Wavelet Representations and Fixed Points of the Transfer Operators	279
14.4	Maximal Commutativity of Subalgebras, Irreducibility of Representations and Freeness and Minimality of Dynamical Systems	284
	References.....	288
15	On a Counterexample to a Conjecture by Blackadar	295
	Adam P.W. Sørensen	
15.1	Introduction.....	295
15.2	Toolbox	297
15.3	Constructing a Counterexample	300
	References.....	302
16	The Topological Dimension of Type I C^*-Algebras	305
	Hannes Thiel	
16.1	Introduction.....	305
16.2	Preliminaries.....	307
16.3	Dimension Theories for C^* -Algebras.....	309
16.4	Topological Dimension	317
16.5	Dimension Theories of Type I C^* -Algebras	324
	References.....	327
	Index	329

Operator Algebra and Dynamics

Nordforsk Network Closing Conference, Faroe Islands,

May 2012

Carlsen, T.M.; Eilers, S.; Restorff, G.; Silvestrov, S. (Eds.)

2013, XVI, 332 p. 12 illus., 4 illus. in color., Hardcover

ISBN: 978-3-642-39458-4
