

Contents

1 Basic Principles of QCM-D	1
References	7
2 Conformational Change of Grafted Polymer Chains	9
2.1 Introduction	9
2.2 Temperature-induced Conformational Change of Grafted PNIPAM Chains with a Low Grafting Density	10
2.3 Temperature-induced Conformational Change of Grafted PNIPAM Chains with a High Grafting Density	13
2.4 Solvency-induced Conformational Change of PNIPAM Brushes	15
2.5 pH-induced Conformational Change of Grafted Polyelectrolytes	18
2.6 Salt Concentration and Type-induced Conformational Change of Grafted Polyelectrolytes	23
2.7 Conclusion	28
References	29
3 Grafting Kinetics of Polymer Chains	33
3.1 Introduction	33
3.2 Pancake-to-Brush Transition	34
3.3 Mushroom-to-Brush Transition	38
3.4 Conclusion	43
References	43
4 Growth Mechanism of Polyelectrolyte Multilayers	45
4.1 Introduction	45
4.2 Roles of Chain Interpenetration and Conformation in the Growth of PEMs	47
4.3 Specific Ion Effect on the Growth of PEMs	54
4.4 Effects of Chain Rigidity and Architecture on the Growth of PEMs	61
4.5 Conclusion	66
References	66

5	Interactions between Polymers and Phospholipid Membranes	71
5.1	Introduction	71
5.2	Role of Hydrophobic Interaction in the Adsorption of PEG on Lipid Membrane Surface	72
5.3	Effect of Length of Hydrocarbon End Group on the Adsorption of PEG on Lipid Membrane Surface	77
5.4	Conclusion	80
	References	80

QCM-D Studies on Polymer Behavior at Interfaces

Liu, G.; Zhang, G.

2013, VIII, 81 p. 59 illus., 19 illus. in color., Softcover

ISBN: 978-3-642-39789-9
