

# Preface

Many thanks for taking the time to contribute to the *Trust in the Digital World and Cyber Security and Privacy EU Forum* event which took place in Brussels during April 18–19, 2013. The conference programme consisted of fifteen different tracks involving a variety of presentations and panel discussions covering the key challenges and strategies available to effectively manage employee, citizen, and corporate trust. The conference provided an opportunity for those in business, public sector, research and government who are involved in the policy, security, systems, and processes surrounding trust.

This two-day conference organised by EEMA, TDL and CSP EU FORUM, hosted by DG CONNECT of the European Commission and in partnership with the SecCord project, invited presenters, panellists and exhibitors to contribute to this collection of selected papers. Two types of papers were solicited to be published in the post-proceedings of the conference:

- Practical Experience Reports and Tools presenting in-depth description of practitioner experiences, case studies and tools
- Research Papers presenting recent original research results providing new insights to the community.

Papers submitted were peer-reviewed by (at least three) programme committee members and experts. The peer-review process provided authors with valuable feedback in order to improve their papers. The selected papers grouped in thematic parts of these proceedings capture just a snapshot of the two-day conference, which provided an opportunity to present and debate on-going cyber security and privacy research and development in Europe. These proceedings intend to inform researchers, practitioners and policy-makers about research developments and technological opportunities for innovation in cyber security and privacy.

I would like to thank all people who made the publication of these proceedings possible, in particular the authors, the Programme Committee members and reviewers, the conference organisers and the supporting organisations.
