|          |  |           |
|----------|--|-----------|
| <b>1</b> | <b>Introduction</b>  | <b>1</b>  |
| <b>2</b> | <b>Combustion Synthesis</b>                                    | <b>11</b> |
| 2.1      | Nanopowder Synthesis   | 12        |
| 2.2      | Combustion Parameters  | 14        |
| 2.2.1    | Flame Types  | 14        |
| 2.2.2    | Characteristic Temperatures                                    | 15        |
| 2.2.3    | Gas Generation   | 16        |
| 2.2.4    | Atmosphere   | 17        |
| 2.2.5    | Fuel-Oxidant Ratio   | 17        |
| 2.2.6    | Chemical Composition of Precursor Chemicals                    | 18        |
| 2.3      | Fuels  | 19        |
| 2.4      | Oxidants   | 19        |
|          | References   | 20        |
| <b>3</b> | <b>Spray Pyrolysis</b>   | <b>23</b> |
| 3.1      | Introduction   | 23        |
| 3.2      | Spray-Pyrolysis Technique                                      | 24        |
| 3.2.1    | Atomization of Precursor Solution                              | 26        |
| 3.2.2    | Aerosol Transportation   | 26        |
| 3.2.3    | Decomposition of the Precursor                                 | 27        |
| 3.2.4    | Influence of Spray Parameters on the<br>Morphology of the Film | 29        |
|          | References   | 29        |
| <b>4</b> | <b>Electrospinning</b>   | <b>31</b> |
| 4.1      | The Electrospinning Technique                                  | 31        |
| 4.1.1    | Jet Formation  | 34        |
| 4.1.2    | Factors Influencing Fiber Characteristics                      | 38        |
| 4.2      | Electrospinning of Ceramic Fibers                              | 40        |
|          | References   | 41        |

|          |   |    |
|----------|---|----|
| <b>5</b> | <b>CCVD Synthesis of Carbon Nanotubes.</b>          | 43 |
| 5.1      | Carbon and Its Allotropes.                          | 44 |
| 5.2      | Carbon Nanotubes                                    | 46 |
| 5.2.1    | Carbon Nanotubes Properties.                        | 47 |
| 5.3      | Carbon Nanotubes Synthesis                          | 49 |
| 5.3.1    | High Temperatures Methods                           | 49 |
| 5.3.2    | CCVD.   | 50 |
|          | References.   | 56 |
| <b>6</b> | <b>Hydrothermal Synthesis.</b>                      | 61 |
| 6.1      | Introduction  | 61 |
| 6.2      | Application.  | 62 |
| 6.2.1    | Hydrothermal Synthesis of $\text{Al}_2\text{O}_3$ . | 65 |
| 6.2.2    | Hydrothermal Synthesis of Zinc Oxide                | 67 |
| 6.2.3    | Titanium Oxide.                                     | 69 |
|          | References.   | 74 |
| <b>7</b> | <b>High-Energy Milling.</b>                         | 77 |
| 7.1      | The High-Energy Milling Process                     | 78 |
| 7.2      | Application of HEBM for Nanoparticle Production     | 81 |
| 7.2.1    | Nanotubes and Nanowires                             | 81 |
| 7.2.2    | Ceramic Powders                                     | 82 |
| 7.2.3    | Intermettals  | 83 |
|          | References.   | 84 |

Novel Synthesis and Characterization of  
Nanostructured Materials

Alves, A.; Bergmann, C.P.; Berutti, F.A.

2013, IX, 85 p. 38 illus., Hardcover

ISBN: 978-3-642-41274-5
