Introduction	1
Abstract and Notation	7

The Model

1 The Navier-Stokes Equations	11
1.1 The Principles of Continuum Mechanics	11
1.2 Conservation of Mass	14
1.3 Conservation of Momentum	14
1.4 Constitutive Equations	16
Remarks	18
References	18
2 Energy Preserving Boundary Conditions	21
2.1 Generic Transmission Conditions	22
2.2 Impermeable Walls	23
2.3 Free Surfaces and Interfaces	24
2.4 Artificial Boundaries	25
2.5 Energy Preserving Boundary Conditions	25
2.6 Vorticity and Pressure Boundary Conditions	29
Remarks	30
References	31

Bounded Smooth Domains

3 L_p-Theory for Incompressible Newtonian Flows	35
3.1 Necessary Regularity Conditions	38
3.2 Additional Regularity of the Pressure Trace	43
3.3 Necessary Compatibility Conditions	45
3.4 Maximal L_p -Regularity of the Stokes Equations	46
3.5 Associated Stokes Operators	48
3.6 Well-Posedness of the Navier-Stokes Equations	52
Remarks	56
References	61

4	Tools and Methods	67
4.1	L_p -Theory for Elliptic Problems	68
4.2	L_p -Theory for Parabolic Problems	74
4.3	Special Solutions in a Halfspace	77
4.4	Sectorial Operators and Functional Calculus	83
4.5	A Splitting Scheme for the Stokes Equations	90
4.6	Uniform Sobolev Type Embeddings	94
	Remarks	97
	References	99
5	Maximal L_p-Regularity in a Halfspace	101
5.1	Strategy	103
5.2	The Transformed Stokes Equations	106
5.3	Boundary Conditions Involving the Normal Velocity	108
5.4	Boundary Conditions Involving the Pressure	111
	Remarks	114
	References	114
6	Maximal L_p-Regularity in a Bent Halfspace	115
6.1	Strategy	117
6.2	Transformation to a Halfspace	120
6.3	Boundary Conditions Involving the Normal Velocity	124
6.4	Boundary Conditions Involving the Pressure	126
	Remarks	126
	References	126
7	Maximal L_p-Regularity in a Bounded Smooth Domain	127
7.1	Strategy	129
7.2	Partition of the Domain	131
7.3	The Regularity of the Pressure	135
7.4	Boundary Conditions Involving the Normal Velocity	136
7.5	Boundary Conditions Involving the Pressure	143
	Remarks	150
	References	150

Bounded Weakly Singular Domains

8	L_p-Theory in Weakly Singular Domains	153
8.1	Weakly Singular Domains	154
8.2	Necessary Regularity Conditions	158
8.3	Necessary Compatibility Conditions	160
8.4	Maximal L_p -Regularity of the Stokes Equations	161
8.5	L_p -Theory for Elliptic Problems	162
8.6	L_p -Theory for Parabolic Problems	164
8.7	The Reflection Method	164
	Remarks	166
	References	166
	Bibliography	169
	Table of Symbols	175
	Index	181

Lp-Theory for Incompressible Newtonian Flows
Energy Preserving Boundary Conditions, Weakly
Singular Domains
