

## Preface

A few words of gratitude cannot express how much the completion of this thesis is due to the support I have received during the last few years.

Running the risk of excluding some people important to me, I owe a special thank to a small group of individuals: to my supervisor Prof. Henry Schäfer for his continuous advise and guidance during the dissertation, to my sister Isabel for her positive attitude to life and her inspirational character, to my brother Markus for our numerous discussions on econometrics as well as his strong belief in my project, to my mother for emphasising the importance of education in life and for teaching me to be the person I am today, and to my beautiful wife Ainura for the enormous support she gave me over the last few years and all the sacrifices she had to make during my studies.

This book, however, is dedicated to my little son Arman, for bringing love and joy into our lives. His birth and the first few months together during the final phase of my thesis were incredible.
