

# Contents

<b>1</b>	<b>Protease Families, Evolution and Mechanism of Action . . . . .</b>	<b>1</b>
	Neil D. Rawlings	
<b>2</b>	<b>Kinetics of the Interaction of Peptidases with Substrates and Modifiers . . . . .</b>	<b>37</b>
	Antonio Baici, Marko Novinec, and Brigita Lenarčič	
<b>3</b>	<b>Compartmentalization of Proteolysis . . . . .</b>	<b>85</b>
	Klaudia Brix, Christopher J. Scott, and Margarete M.S. Heck	
<b>4</b>	<b>Cathepsins: Getting in Shape for Lysosomal Proteolysis . . . . .</b>	<b>127</b>
	Ann H. Erickson, Ciro Isidoro, Lukas Mach, and John S. Mort	
<b>5</b>	<b>Limited and Degradative Proteolysis in the Context of Posttranslational Regulatory Networks: Current Technical and Conceptional Advances . . . . .</b>	<b>175</b>
	Stefan Tholen, Maria Magdalena Koczorowska, Zon Weng Lai, Joern Dengjel, and Oliver Schilling	
<b>6</b>	<b>Exploring Systemic Functions of Lysosomal Proteases: The Perspective of Genetically Modified Mouse Models . . . . .</b>	<b>217</b>
	Martina Gansz, Ursula Kern, Christoph Peters, and Thomas Reinheckel	
<b>7</b>	<b>Astacins: Proteases in Development and Tissue Differentiation . . .</b>	<b>235</b>
	Walter Stöcker and F. Xavier Gomis-Rüth	
<b>8</b>	<b>Proteases in Death Pathways . . . . .</b>	<b>265</b>
	Andreas Flütsch and Markus G. Grütter	
<b>9</b>	<b>ADAM Proteases in Physiology and Pathophysiology: Cleave to Function in Health or to Cause Disease . . . . .</b>	<b>303</b>
	Joachim Grötzinger and Stefan Rose-John	

<b>10</b>	<b>Proteases in the Nervous System . . . . .</b>	<b>319</b>
	Holger Cynis, Stefan F. Lichtenthaler, Leona Wagner, and Hans-Ulrich Demuth	
<b>11</b>	<b>Proteases in the Mammalian Digestive System . . . . .</b>	<b>373</b>
	S. Gaylen Bradley, Toni M. Antalis, and Judith S. Bond	
<b>12</b>	<b>Calpains in Health and Disease . . . . .</b>	<b>395</b>
	John Anagli, Kevin K.W. Wang, Yasuko Ono, and Hiroyuki Sorimachi	
<b>13</b>	<b>Metalloproteinases in Cartilage Matrix Breakdown: The Roles in Rheumatoid Arthritis and Osteoarthritis . . . . .</b>	<b>433</b>
	Hideaki Nagase and Gillian Murphy	
<b>14</b>	<b>MMP-Mediated Collagen Remodeling and Vessel Functions . . . . .</b>	<b>471</b>
	Agnès Noel and Nor Eddine Sounni	
<b>15</b>	<b>Proteases in Cancer: Significance for Invasion and Metastasis . . . . .</b>	<b>491</b>
	Bonnie F. Sloane, Karin List, Barbara Fingleton, and Lynn Matrisian	
	<b>Index . . . . .</b>	<b>551</b>

Proteases: Structure and Function

Brix, K.; Stöcker, W. (Eds.)

2013, XII, 564 p. 98 illus., 65 illus. in color., Hardcover

ISBN: 978-3-7091-0884-0
