Contents

1 Introduction 1

2 An Overview of Homocysteine Metabolism 7
2.1 Homocysteine Metabolite Levels 8
2.1.1 "Total Homocysteine" 9
2.1.2 *S*-Homocysteinyl-Protein 9
2.1.3 Homocysteine-Thiolactone 10
2.1.4 *N*-Homocysteinyl-Protein 10
2.1.5 *N*ε-Homocysteinyl-Lysine 11
2.1.6 *S*-Adenosylhomocysteine 11
2.1.7 Cystathionine 11
2.1.8 Homocysteic Acid and Homocysteine Sulfinic Acid 11
2.2 Toxicity of Homocysteine Metabolites 12
2.2.1 Free Reduced Homocysteine 13
2.2.2 *S*-Homocysteinyl-Protein 13
2.2.3 Homocysteine-Thiolactone 14
2.2.4 *N*-Homocysteinyl-Protein 16
2.2.5 *N*ε-Homocysteinyl-Lysine 17
2.2.6 *S*-Adenosylhomocysteine 17
2.2.7 Cystathionine 18
2.2.8 Homocysteic Acid 18

3 Homocysteine-Thiolactone 19
3.1 Chemical Synthesis 19
3.1.1 Demethylation of Methionine 19
3.1.2 Acid-Dependent Cyclization of Homocysteine 20
3.2 Physicochemical Properties 20
3.2.1 UV Spectrum 20
3.2.2 pK_a value 23
3.2.3 Stability 23
3.2.4 Reactivity Toward Amino Groups 25
3.2.5 Reactivity Toward Carbonyl Compounds 27

3.3 Quantification Methods 29
3.3.1 Assays Based on Radiolabeling 29
3.3.2 Assays Based on Direct UV Monitoring 29
3.3.3 High-Performance Liquid Chromatography-Based Assays . . 29
3.3.4 Gas Chromatography/Mass Spectrometry Assay 32
3.3.5 Gold Nanoparticle Homocysteine-Thiolactone Sensor 32
3.4 Biosynthesis 33
3.4.1 The Involvement of Methionyl-tRNA Synthetase 33
3.4.2 Molecular Mechanism 37
3.5 Turnover 45
3.5.1 Enzymatic Turnover 45
3.5.2 Urinary Excretion 50
3.6 Clinical Significance 51

4 Discoveries of Protein *S*- and *N*-Homocysteinylation 55

5 *N*-Homocysteinyl-Proteins 59
5.1 Synthesis In Vitro 59
5.2 Biological Formation 62
5.2.1 *N*-Hcy-Protein Levels In Vivo 62
5.2.2 Site-Specific *N*-Homocysteinylation In Vivo 69
5.3 Turnover 71
5.3.1 *N*ε-Homocysteinyl-Lysine 71
5.4 Structural and Functional Consequences 76
5.4.1 *N*-Homocysteinylation and Redox Function 78
5.4.2 *N*-Hcy-Fibrinogen and Fibrin Clot Properties 83
5.4.3 *N*-Homocysteinylation and LDL Function 84
5.4.4 *N*-Homocysteinylation and HDL Function 85
5.4.5 *N*-Homocysteinylation Induces Protein Aggregation and Amyloidal Conversion 86
5.5 Quantification of *N*-Hcy-Protein 94
5.5.1 High-Performance Liquid Chromatography Assay with UV Detection 95
5.5.2 High-Performance Liquid Chromatography Assays with Fluorescence Detection 96
5.5.3 Immunoassays with Rabbit Polyclonal Anti-*N*-Hcy-Protein Antibodies 99
5.5.4 Western Blot Immunoassay for *N*-Hcy-ApoAI 99
5.5.5 Detection of Protein *N*-Homocysteinylation by Selective Reactions with Aldehydes 100
5.5.6 Liquid Chromatography/Mass Spectrometry Analysis of the Site-Specific Protein *N*-Homocysteinylation In Vivo 102

6 Pathophysiological Consequences of Protein *N*-Homocysteinylation . . . 107
6.1 The Hcy-Thiolactone Hypothesis 108
6.1.1 Hcy-Thiolactone Levels in Hyperhomocysteinemia 109
6.1.2 Protein *N*-Linked Hcy in Hyperhomocysteinemia 110

6.2 *N*-Hcy-Protein and Adaptive Autoimmune Responses 111
6.2.1 Atherosclerosis Is an Inflammatory Disease 111
6.2.2 *N*-Hcy-Protein Is Immunogenic in Rabbits 112
6.2.3 *N*-Hcy-Protein Is Autoimmunogenic in Humans 112
6.2.4 Anti-*N*-Hcy-Protein Autoantibodies in Atherosclerosis 114
6.3 *N*-Hcy-Protein and Innate Immune Responses 115
6.4 *N*-Hcy-Fibrinogen and Thrombosis 117
6.5 *N*-Hcy-Collagen and Connective Tissue Abnormalities 119

7 *S*-Homocysteinylated Proteins 121
7.1 Plasma *S*-Homocysteinyl-Proteins 123
7.1.1 *S*-Hcy-Albumin 123
7.1.2 *S*-Hcy-Transthyretin 124
7.1.3 Apolipoprotein B and Lipoprotein[a] 126
7.2 Extracellular Matrix Proteins 127
7.2.1 Fibrillins 127
7.2.2 Fibronectin 129
7.2.3 Tropoelastin 129
7.3 Blood Homeostasis Proteins 130
7.3.1 Factor Va 130
7.3.2 Annexin A2 131
7.4 Intracellular Proteins 132
7.4.1 Heterogenous Nuclear Ribonucleoprotein E1 (hnRNP-E1) 132
7.4.2 Metallothionein 134
7.4.3 Dimethylarginine Dimethylaminohydrolase 134
