

Contents

- 1 Introduction 1**
 - 1.1 Definition of the Subject Area 2
 - 1.2 Problem Description and Research Objectives..... 4
 - 1.3 Outline of the Thesis 7
- 2 Container-Terminal Logistics..... 9**
 - 2.1 Introduction to Container Logistics..... 9
 - 2.1.1 Development and Importance of Container Logistics 10
 - 2.1.2 Container Size and Type 12
 - 2.1.3 Types of Container-Transport Modes..... 13
 - 2.2 Introduction to Container-Terminal Systems..... 14
 - 2.2.1 Container-Terminal Functions 15
 - 2.2.2 Container-Terminal Subsystems and Related Operations ... 17
 - 2.2.3 Container-Terminal Equipment 23
 - 2.3 Assessment of Container Terminals 30
 - 2.3.1 Design Indicators 30
 - 2.3.2 Performance Indicators 33
 - 2.4 Classification of Terminal-Planning Problems 39
 - 2.4.1 Classification of Decision Problems 39
 - 2.4.2 Terminal-Design-Planning Problems 40
 - 2.4.3 Operational Terminal-Planning Problems 43
 - 2.5 Concluding Remarks 51
- 3 Container-Storage Yard 53**
 - 3.1 Classification of the Container-Storage Yard 53
 - 3.1.1 Storage Functions..... 54
 - 3.1.2 Types of Stores 55
 - 3.1.3 Storage Processes..... 56
 - 3.1.4 Summarising Definition of the Container-Storage Yard 59

3.2	Performance Interrelation of Container Terminals and Container-Storage Yards.....	59
3.2.1	Performance Definition of Seaport Container Terminals	60
3.2.2	Performance Definition of Container-Storage Yards.....	63
3.3	Comparison of Different Types of Container-Storage- Yard Systems	66
3.3.1	Straddle-Carrier System	66
3.3.2	Rubber-Tyred-Gantry-Crane System	68
3.3.3	Rail-Mounted-Gantry-Crane System	70
3.3.4	Concluding Comparison	73
3.4	Automated RMGC Systems	74
3.4.1	RMGC Types	75
3.4.2	Technical Specification	80
3.4.3	Processes	82
3.4.4	Planning and Decision Problems	83
3.4.5	Similar Problems and Comparable Logistic Systems.....	84
3.5	Concluding Remarks	86
4	RMGC-Design-Planning Problem	89
4.1	Problem Description.....	89
4.1.1	Decisions	90
4.1.2	Objectives and Restrictions	93
4.1.3	Parameters	95
4.2	Literature Overview	104
4.2.1	Storage-Yard Design	105
4.2.2	RTGC Design	107
4.2.3	RMGC Design	108
4.2.4	Concluding Summary	111
4.3	Types of Research Approaches	112
4.4	Concluding Remarks	115
5	Operational RMGC-Planning Problems	117
5.1	Basic Terms and Notations	117
5.2	Container-Stacking Problem	126
5.2.1	Problem Description.....	126
5.2.2	Literature Overview	129
5.2.3	Classification of Stacking Strategies.....	136
5.2.4	Combined-Cost-Function Stacking	143
5.2.5	Heuristical Housekeeping Stacking.....	148
5.3	Crane-Scheduling Problem	152
5.3.1	Problem Description.....	152
5.3.2	Literature Overview	156
5.3.3	Classification of Scheduling Strategies	165
5.3.4	Preselection Methods	168

5.3.5	Multi-Criteria Priority Rules	171
5.3.6	IP Scheduling Models	174
5.3.7	Alternative Solution Methods	184
5.4	Crane-Routing Problem	192
5.4.1	Problem Description	193
5.4.2	Literature Overview	196
5.4.3	Claiming-Based Crane Routing	198
5.5	Concluding Remarks	201
6	Simulation as a Terminal-Planning Approach	203
6.1	Introduction to Simulation Analysis	204
6.2	Review of Simulation Approaches Within Seaport Container Terminals	206
6.3	Principles for Modelling RMGC Systems	208
6.4	Applied Simulation Model	211
6.4.1	Conceptual Design	212
6.4.2	Main Features	214
6.4.3	Assumptions and Limitations	217
6.4.4	Validation and Verification	218
6.5	Concluding Remarks	219
7	Simulation Study on RMGC-Design Planning	221
7.1	Experimental Design	222
7.1.1	Experimental Procedure	222
7.1.2	General Experimental Setup	224
7.1.3	Default Parameter Settings	226
7.2	Results of RMGC-Design Study	228
7.2.1	First Observations and Formulation of Research Hypotheses	228
7.2.2	In-Depth Analysis of Simulation Results	235
7.2.3	Summary of the RMGC-Design Study	260
7.3	Sensitivity Analysis of RMGC-Design Study	261
7.3.1	Influence of the Filling Rate	262
7.3.2	Influence of the Container-Dwell Time	268
7.3.3	Influence of the Transshipment Factor	276
7.3.4	Influence of the Vessel-Call Pattern	282
7.3.5	Influence of the Crane Kinematics	289
7.3.6	Influence of the Container-Stacking Strategy	295
7.3.7	Influence of the Crane-Scheduling Strategy	308
7.3.8	Influence of the Crane-Routing Strategy	316
7.3.9	Summary of the Sensitivity Analysis	322
7.4	Management Implications	324
7.5	Concluding Remarks	331
8	Summary and Outlook	335
8.1	Summary	335
8.2	Outlook	337

Appendix	341
A.1 Screenshots of Simulation Model.....	341
A.2 Default Parameter Settings	344
A.3 Additional Regression Results of Yard-Block Dimensions	347
A.4 Additional Vessel-Call Patterns	351
A.5 Additional Simulation Results of Sensitivity Analysis	356
A.5.1 Influence of the Filling Rate	356
A.5.2 Influence of the Container-Dwell Time.....	363
A.5.3 Influence of the Transshipment Factor	377
A.5.4 Influence of the Vessel-Call Pattern	384
A.5.5 Influence of the Crane Kinematics.....	392
A.5.6 Influence of the Container-Stacking Strategy	403
A.5.7 Influence of the Crane-Scheduling Strategy.....	425
A.5.8 Influence of the Crane-Routing Strategy	436
