

# Contents

- 1 Introduction . . . . . 1**
  - References . . . . . 5
- 2 Review of Maxwell’s Demon . . . . . 9**
  - 2.1 Original Maxwell’s Demon . . . . . 9
  - 2.2 Szilard Engine . . . . . 10
  - 2.3 Brillouin’s Argument . . . . . 12
  - 2.4 Landauer’s Principle . . . . . 13
  - 2.5 Bennett’s Argument . . . . . 14
  - References . . . . . 16
- 3 Classical Dynamics, Measurement, and Information . . . . . 17**
  - 3.1 Classical Dynamics . . . . . 17
  - 3.2 Classical Information Theory . . . . . 18
    - 3.2.1 Shannon Entropy . . . . . 18
    - 3.2.2 Kullback–Leibler Divergence . . . . . 19
    - 3.2.3 Mutual Information . . . . . 20
  - 3.3 Classical Measurement Theory . . . . . 21
  - References . . . . . 23
- 4 Quantum Dynamics, Measurement, and Information . . . . . 25**
  - 4.1 Quantum Dynamics . . . . . 25
    - 4.1.1 Unitary Evolutions . . . . . 25
    - 4.1.2 Nonunitary Evolutions . . . . . 27
  - 4.2 Quantum Measurement Theory . . . . . 29
    - 4.2.1 Projection Measurement . . . . . 29
    - 4.2.2 POVM and Measurement Operators . . . . . 30
  - 4.3 Quantum Information Theory . . . . . 34
    - 4.3.1 Von Neumann Entropy . . . . . 34
    - 4.3.2 Quantum Kullback–Leibler Divergence . . . . . 35

4.3.3	Holevo Bound . . . . .	36
4.3.4	QC-Mutual Information . . . . .	37
4.3.5	Quantum-Classical Correspondence . . . . .	40
	References . . . . .	42
<b>5</b>	<b>Unitary Proof of the Second Law of Thermodynamics . . . . .</b>	<b>43</b>
5.1	Second Law of Thermodynamics . . . . .	43
5.2	Initial Canonical Distribution with a Single Heat Bath . . . . .	45
5.3	General Situations with Multi-Heat Baths . . . . .	49
	References . . . . .	52
<b>6</b>	<b>Second Law with Feedback Control . . . . .</b>	<b>53</b>
6.1	Entropy Inequality . . . . .	53
6.2	Generalized Second Laws . . . . .	55
6.3	Generalized Szilard Engines . . . . .	58
	References . . . . .	59
<b>7</b>	<b>Thermodynamics of Memories . . . . .</b>	<b>61</b>
7.1	Formulation of Memory . . . . .	61
7.2	Erasure Process . . . . .	62
7.3	Measurement Process . . . . .	66
7.4	Reconciliation with Maxwell's Demon . . . . .	70
7.5	Second Law of Information Thermodynamics . . . . .	72
	References . . . . .	72
<b>8</b>	<b>Stochastic Thermodynamics . . . . .</b>	<b>75</b>
8.1	Dynamics . . . . .	75
8.2	Nonequilibrium Equalities . . . . .	77
8.2.1	Backward Control . . . . .	77
8.2.2	Formulation of Nonequilibrium Equalities . . . . .	78
8.2.3	General Derivation of the Detailed Fluctuation Theorem . . . . .	82
8.3	Markovian Dynamics with Detail Balance . . . . .	85
8.3.1	General Formulation . . . . .	85
8.3.2	Overdamped Langevin Systems . . . . .	87
	References . . . . .	88
<b>9</b>	<b>Nonequilibrium Equalities with Feedback Control . . . . .</b>	<b>91</b>
9.1	Effect of Measurements . . . . .	91
9.1.1	Formulation . . . . .	91
9.1.2	Mutual Information . . . . .	93
9.2	Feedback Control . . . . .	94
9.2.1	Formulation . . . . .	94
9.2.2	Probability Distributions with Feedback . . . . .	96

9.2.3	Detailed Fluctuation Theorem for a Fixed Control Protocol . . . . .	98
9.3	Nonequilibrium Equalities with Feedback Control . . . . .	99
9.3.1	Generalized Fluctuation Theorem with Mutual Information . . . . .	99
9.3.2	Generalized Fluctuation Theorem with Efficacy Parameter . . . . .	102
9.4	Examples . . . . .	107
9.4.1	Szilard Engine with Measurement Errors . . . . .	107
9.4.2	Feedback-Controlled Ratchet . . . . .	109
	References . . . . .	112
<b>10</b>	<b>Conclusions</b> . . . . .	<b>115</b>
	References . . . . .	117

Thermodynamics of Information Processing in Small  
Systems

Sagawa, T.

2013, XVI, 120 p., Hardcover

ISBN: 978-4-431-54167-7
