

# Contents

<b>Determining Capacity Credit for Wind Used in MISO Resource Adequacy . . . . .</b>	<b>1</b>
Brandon Heath, Charles Tyson and John Lawhorn	
<b>Wind Power Scenario Tree Tool: Development and Methodology . . . .</b>	<b>13</b>
Colm Lowery and Mark O'Malley	
<b>Probabilistic Ramp Detection and Forecasting for Wind Power Prediction . . . . .</b>	<b>29</b>
C. Ferreira, J. Gama, V. Miranda and A. Botterud	
<b>Application of Hourly Time Series Models in Day-ahead Wind Power Commitment . . . . .</b>	<b>45</b>
Suman Thapa, Rajesh Karki and Roy Billinton	
<b>Probabilistic Guarantees for the N-1 Security of Systems with Wind Power Generation . . . . .</b>	<b>59</b>
Maria Vrakopoulou, Kostas Margellos, John Lygeros and Göran Andersson	
<b>Adequacy and Security Measures in Integrated Intermittent Renewable Generation Systems . . . . .</b>	<b>75</b>
Wijarn Wangdee, Roy Billinton and Wenyan Li	
<b>Representation of Wind and Load Correlation in Non-Sequential Monte Carlo Reliability Evaluation . . . . .</b>	<b>91</b>
Carmen L. T. Borges and Julio A. S. Dias	
<b>Composite Reliability Assessment of Power Systems with Large Penetration of Renewable Sources . . . . .</b>	<b>107</b>
Armando M. Leite da Silva, Luiz Antônio F. Manso, Silvan A. Flávio, Mauro A. da Rosa and Leonidas C. Resende	

Reliability and Risk Evaluation of Wind Integrated Power  
Systems

Billinton, R.; Karki, R.; Verma, A.K. (Eds.)

2013, XIV, 128 p., Hardcover

ISBN: 978-81-322-0986-7
