

Contents

Part I

1	Processes	3
2	More About Independence	11
3	Conditional Probability in Practice	15
4	Stationary Processes	17
5	Normality	23
6	Trends	33
7	Autocorrelation	39
8	Ljung-Box	47
9	Periodogram	49

Part II

10	Indicators	55
11	Process of the $AR(p)$ Type	63
12	Generalizations	69
13	The Complete Open-Loop Scheme	73
14	Physical Realizability	79
15	The Equity Line	83
16	Predictions	89
17	Optimal $AR(p)$ in Practice	95
18	Maps in Series	101

Part III

19	Transfer Functions	111
20	Simple Lag	115
21	Gauss Filters	119
22	Stability	125
23	Lag Compensator	127
24	Lead Compensator	135
25	RLC Filter	141
26	Leading Indicator	147
27	Regularized Filter	155
28	High-Pass Filter	159
29	Frequency Transformation	163
30	Gaussianization	165

Part IV

31	Feedback Trading	173
32	Feedback Systems	181

Part V

33	State Space Approach	193
34	Sensitivity	197
35	Butterworth Filter	205
36	Frequency Response	209
37	Signal-to-Noise Ratio: Tradability	215
38	Equity StN	223
39	Meyer Optimum Trading System	225
	Conclusions	232
