<b>1</b>	<b>Cardiac Anatomy and Pathophysiology of Coronary Circulation as a Basis for Imaging . . . . .</b>	<b>1</b>
	Josef Fox, Neeta Pandit-Taskar and H. William Strauss	
1.1	Introduction . . . . .	1
1.2	Anatomy . . . . .	2
1.3	Physiology . . . . .	3
1.3.1	Circulation . . . . .	3
1.3.2	Mechanical Activity of the Heart . . . . .	3
1.3.3	Electrical Activity of the Heart . . . . .	4
1.4	Radionuclide Imaging . . . . .	5
1.5	Myocardial Perfusion Imaging . . . . .	5
1.5.1	Single-Photon Agents Used for Perfusion Imaging . . . . .	6
1.5.2	Single-Photon Data Acquisition . . . . .	8
1.5.3	PET and Myocardial Perfusion . . . . .	10
1.6	Radionuclide Evaluation of Ventricular Function. . . . .	11
1.6.1	MUGA . . . . .	11
1.6.2	Data Analysis . . . . .	12
1.7	Imaging Cardiac Neurotransmission. . . . .	13
	References . . . . .	14
<b>2</b>	<b>How Should We Stress the Human Heart? . . . . .</b>	<b>15</b>
	Eliana Reyes	
2.1	Introduction . . . . .	15
2.2	Dynamic Exercise . . . . .	15
2.2.1	Indications . . . . .	16
2.2.2	Contraindications . . . . .	16
2.2.3	Protocols . . . . .	16
2.2.4	Diagnostic Performance and Accuracy. . . . .	17
2.2.5	Safety . . . . .	17
2.3	Pharmacological Agents . . . . .	17
2.3.1	Vasodilators . . . . .	17
2.3.2	Indications . . . . .	20
2.3.3	Contraindications . . . . .	20
2.3.4	Protocols . . . . .	21
2.3.5	Diagnostic Performance and Accuracy. . . . .	23
2.3.6	Safety . . . . .	23

2.4	Inotropic Agents . . . . .	24
2.4.1	Dobutamine . . . . .	24
2.4.2	Indications . . . . .	24
2.4.3	Contraindications . . . . .	24
2.4.4	Protocol . . . . .	24
2.4.5	Diagnostic Performance and Accuracy . . . . .	25
2.4.6	Safety . . . . .	25
2.5	Conclusion . . . . .	25
	References . . . . .	26
<b>3</b>	<b>Myocardial Perfusion Imaging: The Role of SPECT, PET and CMR.</b> . . . .	<b>29</b>
	Caroline E. Veltman, Berlinda J. de Wit-van der Veen, Albert de Roos, Joanne D. Schuijf and Ernst E. van der Wall	
3.1	Introduction . . . . .	29
3.2	Single Photon Emission Computed Tomography . . . . .	29
3.2.1	Principles of Myocardial Perfusion Imaging . . . . .	30
3.2.2	Identifying CAD Using SPECT . . . . .	32
3.2.3	Quantifying Relative Perfusion and Function . . . . .	34
3.2.4	Clinical Value of Gated MPS . . . . .	36
3.3	Positron Emission Tomography . . . . .	37
3.3.1	Principles of Perfusion PET . . . . .	37
3.3.2	CAD Identification Using PET . . . . .	39
3.3.3	Myocardial Viability Imaging . . . . .	41
3.3.4	Clinical Utility of Perfusion PET in Assessing CAD . . . . .	41
3.4	Perfusion Cardiovascular Magnetic Resonance . . . . .	42
3.4.1	Basic Principles of CMR Perfusion . . . . .	42
3.4.2	Image Interpretation . . . . .	42
3.4.3	Additional Imaging Protocols in Cardiovascular Magnetic Resonance Imaging . . . . .	43
3.4.4	Diagnostic Value and Clinical Advantages of CMR Perfusion Imaging . . . . .	44
3.5	Future Perspectives . . . . .	44
3.5.1	Cardiac Hybrid Imaging . . . . .	45
3.5.2	Myocardial Computed Tomography Perfusion . . . . .	45
3.6	Discussion . . . . .	46
	References . . . . .	48
<b>4</b>	<b>Innervation of the Heart: Imaging Findings Using [<sup>123</sup>I]-MIBG Scintigraphy in Different Pathologies . . .</b>	<b>51</b>
	Denis Agostini, Kenichi Nakajima and Hein Jan Verberne	
4.1	Introduction . . . . .	51
4.1.1	Sympathetic Innervation . . . . .	51
4.1.2	From Guanethidine to Meta-Iodobenzylguanidine . . . . .	53
4.1.3	[ <sup>123</sup> I]-MIBG Myocardial Scintigraphy . . . . .	55

4.1.4	Normal Databases of Cardiac MIBG . . . . .	56
4.1.5	[ <sup>123</sup> I]-MIBG Imaging in Cardiac Pathologies . . . .	59
4.2	Cardiac Neurotransmission Imaging	
	Using [ <sup>123</sup> I]-MIBG Scintigraphy in Brain Disease . . . . .	65
4.2.1	Pathological Backgrounds . . . . .	65
4.2.2	[ <sup>123</sup> I]-MIBG Findings in Parkinson's Disease . . . .	66
4.2.3	[ <sup>123</sup> I]-MIBG Findings in Dementia with Lewy Bodies . . . . .	67
4.2.4	Other Neurological Diseases. . . . .	68
4.3	Conclusions . . . . .	68
	References . . . . .	69
<b>5</b>	<b>How to Reduce the Radiation Burden in Cardiac CT . . . . .</b>	<b>71</b>
	Gianluca Pontone	
5.1	Introduction . . . . .	71
5.2	How is Radiation Dose Estimated in MDCT	
	Coronary Angiography. . . . .	73
5.3	A Brief History of MDCT Coronary Angiography. . . . .	74
5.4	Strategies to Minimize Radiation Dose from Cardiac MDCT . . . . .	74
5.4.1	Scan Length Optimization . . . . .	75
5.4.2	Tube Voltage and Tube Current Setup. . . . .	75
5.4.3	ECG-Triggered Tube-Current Modulation . . . . .	76
5.4.4	Dual-Source Computed Tomography. . . . .	77
5.4.5	Prospective ECG Triggering. . . . .	78
5.4.6	Increase in Number of Slices . . . . .	79
5.4.7	Adaptive Iterative Reconstruction Algorithm . . . .	80
5.4.8	High-Pitch Computed Tomography Coronary Angiography. . . . .	81
5.5	Radiation Dose Associated with Different Generations of MDCT . . . . .	82
5.5.1	Low Generation Scanner Up to 64-MDCT. . . . .	82
5.5.2	Low Tube Voltage . . . . .	83
5.5.3	Prospective ECG-Triggering. . . . .	83
5.5.4	Dual Source Computed Tomography. . . . .	84
5.5.5	256- and 320-MDCT Scanner. . . . .	85
5.5.6	Adaptive Statistical Iterative Reconstruction Algorithm (ASIR). . . . .	85
5.5.7	Meta-Analysis . . . . .	86
5.6	Patient Preparation and Contrast Agent Protocol . . . . .	86
5.7	Conclusions . . . . .	88
	References . . . . .	88

<b>6</b>	<b>How to Reduce the Radiation Burden in Cardiac SPECT</b>	<b>91</b>
	Assuero Giorgetti and Dario Genovesi	
6.1	Introduction: Living at the Time of “The Radiation Issue”	91
6.2	Advances in Single-Photon-Emission Computed Tomography Cameras	92
6.2.1	Cadmium-Zinc-Telluride Technology	92
6.2.2	Other SPECT Cameras	93
6.3	Advances in Reconstruction Software	95
6.4	One Face of the Coin: Reducing Imaging Time and Saving Money	95
6.5	The Other Face of the Coin: Reducing Dose and Radiation Burden to the Patient	97
6.6	Conclusion: Nuclear Cardiology at the Time of the “Ulysses Syndrome”	99
	References	100
<b>7</b>	<b>Will 3D Imaging of the Heart Replace Pathology?</b>	<b>103</b>
	Alessia Gimelli and Elena Filidei	
7.1	Introduction	103
7.1.1	Limitations of 2D Imaging	103
7.1.2	Possibilities Using 3D Imaging	103
7.2	Anatomical Measurements	104
7.2.1	Left Ventricular Morphology	104
7.2.2	Right Ventricular Function	104
7.2.3	Myocardial Performance	105
7.3	Functional Evaluation	106
7.3.1	Functional Risk Assessment Versus Noninvasive Coronary Angiography	107
7.4	Myocardial Fibrosis: 3D Evaluation of Interstitium	108
7.4.1	Cardiac Magnetic Resonance Methods	108
7.4.2	Nuclear Cardiology Techniques	109
7.4.3	Contractile Reserve	109
7.4.4	Cardiac Innervation	109
7.5	Myocardial Perfusion Imaging and Revascularization	110
7.6	Proper Diagnostic Workup	111
7.7	Conclusions	111
	References	111
<b>8</b>	<b>Image Fusion and Coregistration: State of the (He)art</b>	<b>115</b>
	Stephan G. Nekolla, Christoph Rischpler and Martina Marinelli	
8.1	Introduction	115
8.2	Regulatory Issues and Software Development	115
8.3	Combining Functional and Morphology Data: Individualized Analysis	116
8.4	Necessary Prerequisite: Coregistration	116
8.5	Tools for Hybrid Cardiac Imaging	117

8.5.1	Extensions to CTA Visualization Tools . . . . .	117
8.5.2	Integration of the Coronary Tree into Tools for Nuclear Cardiology . . . . .	118
8.6	Going Beyond Perfusion SPECT/PET/CTA . . . . .	119
8.7	What is Missing? . . . . .	121
8.8	Conclusions . . . . .	122
