

Contents

Introduction to Software Fault Injection	1
Domenico Cotroneo and Henrique Madeira	
Introduction to Safety Critical Systems	17
Roberto Pietrantuono and Stefano Russo	
Introduction to Software Security Concepts	29
Marco Vieira and Nuno Antunes	
 Part I V&V in Safety Critical System	
Safety-Critical Standards for Verification and Validation	41
Christian Esposito, Ricardo Barbosa and Nuno Silva	
Robustness Testing of Web Services.	55
Aniello Napolitano, Gabriella Carrozza, Nuno Laranjeiro and Marco Vieira	
JFIT: An Automatic Tool for Assessing Robustness of DDS-Compliant Middleware	69
Antonio Bovenzi, Aniello Napolitano, Christian Esposito and Gabriella Carrozza	
 Part II Fault Injection	
Tools for Injecting Software Faults at the Binary and Source-Code Level	85
Anna Lanzaro, Roberto Natella and Ricardo Barbosa	

Survey on Software Faults Injection in Java Applications	101
Aniello Napolitano, Gabriella Carrozza, Nuno Antunes and Joao Duraes	
Evaluating Fault-Tolerance of Publish/Subscribe Services	115
Christian Esposito	
Leveraging Fault Injection Techniques in Critical Industrial Applications	131
Antonio Pecchia, Anna Lanzaro, As'ad Salkham, Marcello Cinque and Nuno Silva	
 Part III Security	
Using Vulnerability Injection to Improve Web Security	145
José Fonseca and Francesca Matarese	
Security Testing in SOAs: Techniques and Tools	159
Nuno Antunes and Marco Vieira	
Selected Challenges on Security and Dependability of Embedded Systems	175
Przemysław Osocha, João Carlos Cunha and Francesca Matarese	
 Part IV Monitoring and Diagnosing	
Monitoring Infrastructure for Diagnosing Complex Software	189
Antonio Bovenzi and Gabriella Carrozza	
Log-Based Failure Analysis of Complex Systems: Methodology and Relevant Applications	203
Antonio Pecchia and Marcello Cinque	

Innovative Technologies for Dependable OTS-Based
Critical Systems
Challenges and Achievements of the CRITICAL STEP
Project

Cotroneo, D. (Ed.)

2013, VIII, 216 p., Hardcover

ISBN: 978-88-470-2771-8
