

# Contents

## **Part I Globalization and Chemical Education**

Mei-Hung Chiu

<b>Dissemination of Achievements in Chemical Education (Research) via EU Projects .....</b>	<b>3</b>
Anna Kolasa and Iwona Maciejowska	
<b>Polish Education Reform and Resulting Changes in the Process of Chemical Education .....</b>	<b>15</b>
Hanna Gulińska	

## **Part II Learning and Conceptual Change in Chemistry**

Jing-Wen Lin

<b>Assessment of Chemistry Anxiety Among College Students.....</b>	<b>27</b>
Chen@Chong Sheau Huey	
<b>Teacher-Student Interactions: The Roles of In-Class Written Questions .....</b>	<b>35</b>
Liliana Mammino	
<b>Probing and Fostering Students' Reasoning Abilities with a Cyclic Predict-Observe-Explain Strategy .....</b>	<b>49</b>
Jia-Lin Chang, Chiing-Chang Chen, Chia-Hsing Tsai, Yong-Chang Chen, Meng-Hsun Chou, and Ling-Chuan Chang	
<b>A Trial of Placement and Embodiment of Images for Chemical Concepts in the Lesson Model of a "Surface Active Agent" Through SEIC .....</b>	<b>59</b>
Haruo Ogawa and Hiroki Fujii	

### **Part III Teaching Chemistry**

Hsiao-Lin Tuan

<b>Chemistry Pre-service Teachers' Mental Models of Science Teaching and Learning in Malaysia .....</b>	<b>73</b>
Maryam Sulaiman and Zurida Haji Ismail	
<b>Chemistry Teachers Enhance Their Knowledge in Contemporary Scientific Areas .....</b>	<b>85</b>
Rachel Mamlok-Naaman, Ron Blonder, and Avi Hofstein	
<b>Practical Science Activities in Primary Schools in Malaysia .....</b>	<b>97</b>
Norita Mohamed, Mashita Abdullah, and Zurida Haji Ismail	
<b>Teaching Chemistry Effectively with Engineering Majors: Teaching Beyond the Textbook .....</b>	<b>109</b>
Yermesha Kyle, Stephen Bacon, Amber Park, Jameka Griffin, Raicherylon Cummins, Raymond Hooks, Bailu Qian, and Hua-Jun Fan	
<b>Problem-Based Learning as an Approach to Teach Cell Potential in Matriculation College, Malaysia .....</b>	<b>121</b>
Kai-Li Teh and Nooraida Yakob	
<b>Teaching Catalysis by Means of Enzymes and Microorganisms .....</b>	<b>131</b>
Peter Grunwald	
<b>The Application of the SATL in Biochemistry .....</b>	<b>145</b>
Suzana B. Golemi	

### **Part IV Curriculum and Assessment in Chemistry Education**

Mei-Hung Chiu

<b>An Alignment Analysis of Junior High School Chemistry Curriculum Standards and City-Wide Exit Exams in China .....</b>	<b>157</b>
Hongjia Ma, Gavin W. Fulmer, Ling L. Liang, Xian Chen, Xinlu Li, and Yuan Li	
<b>A National Survey of Students' Conceptions and Their Sources of Chemistry in Taiwan: Examples of Chemical Equilibrium and Acids/Bases .....</b>	<b>171</b>
Jing-Wen Lin and Mei-Hung Chiu	
<b>The Use of Electronic Media for Chemical Education Research .....</b>	<b>185</b>
Francis Burns and David Frank	
<b>Investigation of Tertiary Chemistry Learning Environment in Sabah, Malaysia .....</b>	<b>197</b>
Yoon-Fah Lay and Chwee-Hoon Khoo	

<b>The Evaluation of Chemistry Competence for Freshmen at Technology Colleges in Taiwan .....</b>	<b>211</b>
Ji-Chyuan Yang, Ching-Yun Hsu, Wen-Jyh Wang, Chia-Hui Tai, Hong-Hsin Huang, and Ping-Chih Huang	
<b>Changes in Teachers' Views of Cognitive Apprenticeship for Situated Learning in Developing a Chemistry Laboratory Course.....</b>	<b>221</b>
Hui-Jung Chen and Mei-Hung Chiu	
<b>Part V E-learning and Innovative Instruction</b>	
Hsin-Kai Wu	
<b>Application of Mind Maps and Mind Manager to Improve Students' Competence in Solving Chemistry Problems .....</b>	<b>235</b>
Zhen Lu, Zheng Zou, and Yitian Zhang	
<b>An Integrated-ICT Assessment for College Students' Performances of Chemical Learning.....</b>	<b>247</b>
King-Dow Su	
<b>Academic Performance and Attitude Toward Computer-Aided Instruction in Chemistry .....</b>	<b>257</b>
Ronaldo C. Reyes	
<b>Integrating Instant Response System (IRS) as an In-Class Assessment Tool into Undergraduate Chemistry Learning Experience: Student Perceptions and Performance .....</b>	<b>267</b>
Tzy-Ling Chen, Yan-Fu Lin, Yi-Lin Liu, Hsiu-Ping Yueh, Horn-Jiunn Sheen, and Wei-Jane Lin	
<b>Part VI Microscale Lab Chemistry</b>	
Chin-Cheng Chou	
<b>Aqueous Cationic and Anionic Surfactants for Microscale Experiments in Organic Chemistry Teaching Laboratories .....</b>	<b>279</b>
Masayuki Inoue, Yuko Kato, Emi Joguchi, and Wataru Banba	
<b>Development of an Analytical Method of Gaseous Mixtures Using a Syringe .....</b>	<b>293</b>
Takashi Yasuoka	
<b>Microscale Experiments Using a Low-Cost Conductance Meter .....</b>	<b>303</b>
Jose H. Bergantin, Jr., Djohn Reb T. Cleofe, and Fortunato Sevilla III	
<b>Introducing Microscale Experimentation in Volumetric Analysis for Pre-service Teachers .....</b>	<b>311</b>
Mashita Abdullah, Norita Mohamed, and Zurida Haji Ismail	

<b>Innovative Techniques in Microscale Chemistry Experiments.....</b>	<b>321</b>
Kwok Man Chan	
<b>Microscale Experiment on Decreases in Volume When Forming Binary Liquid Mixtures: Four Alkanol Aqueous Solutions .....</b>	<b>335</b>
Tetsuo Nakagawa	
<b>Index.....</b>	<b>347</b>

Chemistry Education and Sustainability in the Global  
Age

Chiu, M.-H.; Tuan, H.-L.; Wu, H.-K.; Lin, J.-W.; Chou, C.-C.  
(Eds.)

2013, XII, 352 p., Hardcover

ISBN: 978-94-007-4859-0
