

# Contents

<b>Speed Skating Modeling . . . . .</b>	<b>1</b>
A.L. Schwab, D.M. Fintelman, and O. den Braver	
<b>Contact Modelling in Multibody Systems by Means of a Boundary Element Co-simulation and a DIRICHLET-to-NEUMANN Algorithm . . . . .</b>	<b>25</b>
János Zierath and Christoph Woernle	
<b>Trajectory Control of Serial and Parallel Flexible Manipulators Using Model Inversion . . . . .</b>	<b>53</b>
Robert Seifried, Markus Burkhardt, and Alexander Held	
<b>A 3D Shear Deformable Finite Element Based on the Absolute Nodal Coordinate Formulation . . . . .</b>	<b>77</b>
Karin Nachbagauer, Peter Gruber, and Johannes Gerstmayr	
<b>A Variational Approach to Multirate Integration for Constrained Systems . . . . .</b>	<b>97</b>
Sigrid Leyendecker and Sina Ober-Blöbaum	
<b>Symbolic Sensitivity Analysis of Multibody Systems . . . . .</b>	<b>123</b>
Joydeep M. Banerjee and John McPhee	
<b>Efficient Coarse-Grained Molecular Simulations in the Multibody Dynamics Scheme . . . . .</b>	<b>147</b>
Mohammad Poursina and Kurt S. Anderson	
<b>Efficiency and Precise Interaction for Multibody Simulations in Augmented Reality . . . . .</b>	<b>173</b>
Lorenzo Mariti and Pier Paolo Valentini	
<b>Modelling of Contact Between Stiff Bodies in Automotive Transmission Systems . . . . .</b>	<b>193</b>
Geoffrey Virlez, Olivier Brüls, Nicolas Poulet, Emmanuel Tromme, and Pierre Duysinx
