

# Contents

- 1 Introduction . . . . . 1**
  - 1.1 Local Equilibrium . . . . . 1
  - 1.2 Fluctuations . . . . . 4
  - 1.3 Physical Meaning of the Entropy Changes . . . . . 6
  - 1.4 Application to Thermodynamics . . . . . 8
  - 1.5 Problems . . . . . 11
  - References . . . . . 11
- 2 Microscopic Reversibility . . . . . 13**
  - 2.1 Probability Distributions . . . . . 13
  - 2.2 Microscopic Reversibility . . . . . 15
  - 2.3 Onsager’s Reciprocity Relations . . . . . 17
  - 2.4 Fluctuation-Dissipation Theorem . . . . . 20
  - 2.5 Problems . . . . . 24
  - References . . . . . 24
- 3 Langevin Equation . . . . . 25**
  - 3.1 Brownian Motion . . . . . 25
  - 3.2 One-Dimensional Langevin Equation . . . . . 28
  - 3.3 Generalized Langevin Equation . . . . . 31
  - 3.4 Problems . . . . . 32
  - References . . . . . 33
- 4 Fokker-Planck Equation . . . . . 35**
  - 4.1 Markov Processes . . . . . 35
  - 4.2 Derivation of the Fokker-Planck Equation . . . . . 36
  - 4.3 General Solution of the FPE . . . . . 39
  - 4.4 Fluctuation-Dissipation Theorem . . . . . 41
  - 4.5 “Violation” of the FD Theorem . . . . . 43
  - 4.6 Wiener’s Process . . . . . 45
  - 4.7 Problems . . . . . 47
  - References . . . . . 48
