1	Introduction	1
	References	3
2	Theory and Fundamentals of Ultrasound	5
2.1	Theoretical Aspects of Ultrasound	5
2.2	Conclusion	11
	References	12
3	Applications of Ultrasound Technology in	
	Environmental Remediation	13
3.1	Ultrasound Treatment of Chlorinated Compounds	13
3.2	Ultrasound Treatment of Phenolic Compounds	15
3.2.1	4-Chlorophenol	29
3.2.2	Bisphenol A	30
3.2.3	Other Phenolic Compounds	31
3.3	Ultrasound Treatment of Carboxylic Acids	35
3.4	Ultrasound Treatment of Polymer	36
3.5	Ultrasound Treatment of Dye Wastewater	41
3.5.1	Reactive Dyes	42
3.5.2	Basic Dyes	65
3.5.3	Acid Dyes	67
3.5.4	Indicator Dyes	69
3.5.5	Direct Dyes	71
3.5.6	Food Dyes	72
3.6	Ultrasonic Treatment of Pharmaceutical Compounds	72
3.7	Ultrasonic Treatment of Pesticides	75
3.8	Conclusion	84
	References	84

4	Efficiency Issues for Ultrasound	95
4.1	Operating Parameters	95
4.1.1	Ultrasound Frequency	95
4.1.2	Ultrasound Intensity	96
4.1.3	Temperature	97
4.1.4	Initial pH	97
4.1.5	Initial Concentration	98
4.2	Integrated Treatments with Other Advanced Oxidation Processes	98
4.2.1	Ultrasound/O ₃	99
4.2.2	Ultrasound/UV (Sonophotolytic)	99
4.2.3	Ultrasound/UV/Photocatalysts (Sonophotocatalytic)	100
4.2.4	Ultrasound/ Fe/EDTA (Fenton-Like System)	100
4.2.5	Ultrasound/H ₂ O ₂ /Fe ₂ O ₃ (Sono-Fenton)	101
4.3	Additives	102
4.3.1	Carbon Tetrachloride (CCl ₄)	102
4.3.2	Catalysts (TiO ₂ , SiO ₂ , SnO ₂)	102
4.3.3	Fe-Containing Additives (ZVI, DVI, NPI)	103
4.3.4	Salt	103
4.3.5	Coal Ash	103
4.4	Conclusion	104
	References	104
5	Challenges and Recent Developments of Sonochemical Processes	109
5.1	Challenges in Sonochemical Processes for Pollutant Degradation	109
5.2	Recent Developments in Design and Scale-Up of Sonoreactors	111
5.3	Conclusion	119
	References	119

Advances in Ultrasound Technology for Environmental
Remediation

Wu, T.Y.; Guo, N.; Teh, C.Y.; Hay, J.X.W.

2013, VI, 120 p. 11 illus., 2 illus. in color., Softcover

ISBN: 978-94-007-5532-1
