

Contents

Part I Philosophy & Background	
Ubiratan D'Ambrosio	
Introduction: Major Themes, Technologies, and Timeline	5
Jeremy Roschelle and Stephen Hegedus	
The Mathematics of Change and Variation from a Millennial	
Perspective: New Content, New Context	13
James J. Kaput and Jeremy Roschelle	
From Static to Dynamic Mathematics: Historical and Representational	
Perspectives	27
Luis Moreno-Armella and Stephen Hegedus	
Intersecting Representation and Communication Infrastructures	47
Stephen Hegedus and Luis Moreno-Armella	
Part II Aspects of Design	
Reflections on Significant Developments in Designing SimCalc Software .	65
James Burke, Stephen Hegedus, and Ryan Robidoux	
Designing for Generative Activities: Expanding Spaces for Learning	
and Teaching	85
Nancy Ares	
SimCalc and the Networked Classroom	99
Corey Brady, Tobin White, Sarah Davis, and Stephen Hegedus	
Part III Impacts from Large-Scale Research	
Jinfa Cai	
SimCalc at Scale: Three Studies Examine the Integration of Technology,	
Curriculum, and Professional Development for Advancing Middle	
School Mathematics	125
Jeremy Roschelle and Nicole Shechtman	

Learning and Participation in High School Classrooms	145
Sara Dalton and Stephen Hegedus	
Development of Student and Teacher Assessments in the Scaling Up SimCalc Project	167
Nicole Shechtman, Geneva Haertel, Jeremy Roschelle, Jennifer Knudsen, and Corinne Singleton	
Sustainable Use of Dynamic Representational Environments: Toward a District-Wide Adoption of SimCalc-Based Materials	183
Phil Vahey, George J. Roy, and Vivian Fueyo	
Impact of Classroom Connectivity on Learning and Participation	203
Stephen Hegedus, Luis Moreno-Armella, Sara Dalton, Arden Brookstein, and John Tapper	
Part IV Impacts from Small-Scale Research	
Mathematical Discourse as a Process that Mediates Learning in SimCalc Classrooms	233
Jessica Pierson Bishop	
Scaling Up Innovative Mathematics in the Middle Grades: Case Studies of “Good Enough” Enactments	251
Susan B. Empson, Steven Greenstein, Luz Maldonado, and Jeremy Roschelle	
Changing from the Inside Out: SimCalc Teacher Changes in Beliefs and Practices	271
John Tapper	
Connection Making: Capitalizing on the Affordances of Dynamic Representations Through Mathematically Relevant Questioning . .	285
Chandra Hawley Orrill	
“They Need to Be Solid in Standard Skills First”: How Standards Can Become the Upper Bound	299
Margaret Dickey-Kurdziolek and Deborah Tatar	
Part V International Contributions	
Developing and Enhancing Elementary School Students’ Higher Order Mathematical Thinking with SimCalc	319
Demetra Pitta-Pantazi, Paraskevi Sophocleous, and Constantinos Christou	
Adapting SimCalc to Different School Mathematics Cultures: A Case Study from Brazil	341
Rosana Nogueira de Lima, Lulu Healy, and Tânia M.M. Campos	

Mathematical Modeling with SimCalc: Enhancing Students' Complex Problem Solving Skills Using a Modeling Approach	363
Nicholas G. Mousoulides	
Approaching Calculus with SimCalc: Linking Derivative and Antiderivative	383
Patricia Salinas	
Part VI Extensions, Commentaries, & Future Visions	
You Can Lead a Horse to Water...: Issues in Deepening Learning Through Deepening Teaching	403
John Mason	
Modeling as a Means for Making Powerful Ideas Accessible to Children at an Early Age	419
Richard Lesh, Lyn English, Serife Sevis, and Chanda Riggs	
The Kaputian Program and Its Relation to DNR-Based Instruction: A Common Commitment to the Development of Mathematics with Meaning	437
Guershon Harel	
The Evolution of Technology and the Mathematics of Change and Variation: Using Human Perceptions and Emotions to Make Sense of Powerful Ideas	449
David Tall	
Conversation About SimCalc, Its Evolution and Lessons Along the Way .	463
Eric Hamilton and Nora Sabelli	
Index	475

The SimCalc Vision and Contributions
Democratizing Access to Important Mathematics
Hegedus, S.J.; Roschelle, J. (Eds.)
2013, XII, 480 p., Hardcover
ISBN: 978-94-007-5695-3
