

Contents

Introduction: Concepts of Matter – Complex to Teach and Difficult to Learn	1
Georgios Tsaparlis and Hannah Sevian	
 Part I Learning Progressions for Teaching a Particle Model of Matter	
Learning Progression Developed to Support Students in Building a Particle Model of Matter	11
Joi Merritt and Joseph Krajcik	
How Students’ Understanding of Particle Theory Develops: A Learning Progression	47
Philip Johnson	
Implicit Assumptions and Progress Variables in a Learning Progression About Structure and Motion of Matter	69
Hannah Sevian and Marilyne Stains	
At the Beginning Was Amount of Material: A Learning Progression for Matter for Early Elementary Grades	95
Marianne Wiser, Kathryn E. Frazier, and Victoria Fox	
 Part II Students’ and Teachers’ Mental Models of the Particulate Nature of Matter	
Understanding of Basic Particle Nature of Matter Concepts by Secondary School Students Following an Intervention Programme.....	125
David F. Treagust, A.L. Chandrasegaran, Lilia Halim, Eng-Tek Ong, Ahmad Nurulazam Md Zain, and Mageswary Karpudewan	

The Use of Multiple Perspectives of Conceptual Change to Investigate Students' Mental Models of Gas Particles	143
Mei-Hung Chiu and Shiao-Lan Chung	
The Atom as a Tiny Solar System: Turkish High School Students' Understanding of the Atom in Relation to a Common Teaching Analogy	169
Canan Nakiboğlu and Keith S. Taber	
A Study on the Exploratory Use of Microscopic Models as Investigative Tools: The Case of Electrostatic Polarization	199
Eleni Petridou, Dimitris Psillos, Euripides Hatzikraniotis, and Maria Kallery	
Teacher Pathways Through the Particulate Nature of Matter in Lower Secondary School Chemistry: Continuous Switching Between Different Models or a Coherent Conceptual Structure?	213
Ingo Eilks	
What Do We Know About Students' Beliefs? Changes in Students' Conceptions of the Particulate Nature of Matter from Pre-instruction to College	231
Faik Ö. Karataş, Suat Ünal, Gregory Durland, and George Bodner	
Diagnostic Assessment of Student Understanding of the Particulate Nature of Matter: Decades of Research	249
Ajda Kahveci	
Part III Educational Technology	
Dynamic Visualizations: Tools for Understanding the Particulate Nature of Matter	281
Sevil Akaygun and Loretta L. Jones	
From the Scientific to the Educational: Using Monte Carlo Simulations of the Microkosmos for Science Education by Inquiry	301
George Kalkanis	
Part IV Chemical Reactions, Chemical Phenomena	
Can Simple Particle Models Support Satisfying Explanations of Chemical Changes for Young Students?	319
George Papageorgiou	
How Do Students Reason About Chemical Substances and Reactions?	331
Vicente Talanquer	

Developing Chemical Understanding in the Explanatory Vacuum: Swedish High School Students' Use of an Anthropomorphic Conceptual Framework to Make Sense of Chemical Phenomena	347
Keith S. Taber and Karina Adbo	

Part V Chemical Structure and Bonding

Teaching and Learning of the Chemical Bonding Concept: Problems and Some Pedagogical Issues and Recommendations	373
Tami Levy Nahum, Rachel Mamlok-Naaman, and Avi Hofstein	

A Common Core to Chemical Conceptions: Learners' Conceptions of Chemical Stability, Change and Bonding.....	391
Keith S. Taber	

Macro–Micro Thinking with Structure–Property Relations: Integrating 'Meso-levels' in Secondary Education	419
Marijn R. Meijer, Astrid M.W. Bulte, and Albert Pilot	

Learning and Teaching the Basic Quantum Chemical Concepts	437
Georgios Tsaparlis	

Part VI History and Philosophy of Science

Investigating the Historical Development of the Concept of Matter: Controversies About/In Ancient Atomism	463
Constantine D. Skordoulis and Vangelis Koutalis	

Toward a Scientifically Sound Understanding of Concepts of Matter	485
Georgios Tsaparlis and Hannah Sevian	

Index.....	521
