

Contents

1	Introduction	1
1.1	Why so much Emphasis is Being Laid on Renewable Energies?	1
1.2	What is the Scope for Solar Energy Usage in Mauritius?	2
1.3	Purpose of Book	3
1.4	Book Structure.	3
	References	3
2	The Physics of the Sun	5
2.1	Irradiance and the Electromagnetic Spectrum	6
2.2	Theoretical Estimation of the Solar Constant.	8
2.3	Astronomy	9
	2.3.1 The Horizontal (alt–az) System	9
	2.3.2 The Equatorial System	10
2.4	The Sun’s Position.	11
	2.4.1 Validity of Sun’s Algorithms	14
2.5	Chapter Summary	15
	References	15
3	Solar Tracking	17
3.1	Fixed System Versus Solar Tracker	17
3.2	Operating Principles of Solar Trackers	18
	3.2.1 Dynamic Trackers	18
	3.2.2 Chronological Trackers.	20
3.3	Overview of System Operation	22
3.4	Prototype Design	23
3.5	Feasibility Study	23
	3.5.1 Technology/System Analysis.	23
	3.5.2 Time-Factor Analysis	23
	3.5.3 Cost/Beneficial Analysis.	24

3.6	Solar Tracker Design and Realisation	26
3.6.1	Microcontroller	26
3.6.2	Time Keeping	29
3.6.3	Liquid Crystal Display	30
3.6.4	Motor Control	31
3.7	Circuit Implementation	38
3.8	Microcontroller Programming	40
3.9	Prototype Implementation and Realisation.	40
3.9.1	Mode of Operation of System	42
3.10	Solar Tracker Cost	45
3.11	Chapter Summary	46
	References	46
4	Solar Concentrators	49
4.1	Linear Concentrators	50
4.1.1	Parabolic Trough	50
4.1.2	Fresnel Reflector	51
4.2	Parabolic Dish	52
4.3	Power Tower Systems	53
4.4	Summary of Solar Concentrators	54
4.5	Reflective Materials	54
4.6	Realisation of the Solar Concentrator	55
4.6.1	Construction of the Parabola	57
4.6.2	Fibreglass Layout	58
4.6.3	Reflective Material Layout	59
4.7	Chapter Summary	60
	References	61
5	Results and Discussion	63
5.1	Tracking Performance.	63
5.2	Study of the Parabolic Dish Focussing Performance.	65
5.3	Temperatures Achieved with Various Materials at the Focus. . .	66
5.4	Prediction of the Available Power of the Solar Concentrator. . .	67
5.5	Power Output of the Solar Concentrator at the Focal Plane. . .	68
5.5.1	Measurement Procedure	68
5.5.2	Test Day: 15 th of March 2009.	69
5.6	Interpretation of Results	71
5.7	Chapter Summary and Prospects	74
	References	75
6	Conclusion.	77
6.1	Recommendations for Further Work.	78

Appendix A: Matlab\Octave Script for Computing the Sun's Position.	81
Appendix B: Solar Tracker Circuit Realisation	83
Appendix C: PIC Microcontroller ASM Code	87
Appendix D: Mechanical Systems	93
Index	97

Tracking Solar Concentrators

A Low Budget Solution

Jagoo, Z.

2013, XX, 99 p. 55 illus., 25 illus. in color., Softcover

ISBN: 978-94-007-6103-2
