11	Australian Large Impact Structures (>20 km Diameter)	107
11.1	Yarrabubba, Western Australia (D < 70 km; <2.65 Ga).	108
11.2	Acraman, South Australia (~580 Ma; D = 30–90 km) and Bunyerroo ejecta	109
11.3	Shoemaker, Western Australia (>568 Ma; D = 29–31 km).	110
11.4	Gnargoo, Western Australia (post-early Permian; D = 75 km).	111
11.5	Woodleigh, Western Australia (~359 Ma; D = 120 km)	111
11.6	Warburton Probable Impact Structure, North-East South Australia	112
11.7	Gosses Bluff, Northern Territory (142 Ma; D = 24 km)	114
11.8	Tookoonooka (~125 Ma; D = 55–65 km) and Talundilly (D = 84 km; ~125 Ma) Twin Impact Structures, Eromanga Basin, Queensland	115
11.9	Mount Ashmore Probable Impact Structure, Timor Sea	116

The Asteroid Impact Connection of Planetary Evolution
With Special Reference to Large Precambrian and
Australian impacts

Glikson, A.Y.

2013, XII, 149 p. 54 illus., 46 illus. in color., Softcover

ISBN: 978-94-007-6327-2
