

# Contents

<b>1</b>	<b>Molecular Structures</b>	<b>1</b>
1.1	Calculated Molecular Structures	1
1.2	Experimental Geometries	9
	References	14
<b>2</b>	<b>An Overview of Synthetic Methods for Preparation of Nitrosoaromatic Compounds</b>	<b>15</b>
2.1	Reductive Methods	17
2.2	Oxidative Methods	19
2.3	Solid-State Syntheses	19
2.4	Enzyme Catalyzed Oxidations	20
2.5	Direct Nitrosation	21
2.6	Heteroaromatic Compounds	25
2.7	Nitrosoaromatic Compounds with More Nitroso Groups	26
2.8	Synthesis of Azoxides and Azodioxides	30
	References	32
<b>3</b>	<b>Molecular Properties and Spectroscopy</b>	<b>37</b>
3.1	Physical Organic Chemistry	37
3.1.1	Nature of the -NO Group	38
3.1.2	Nucleophilic Properties	43
3.1.3	Reactions with Nucleophiles	44
3.1.4	Superacid Medium	56
3.1.5	Nitroso Cycloadditions	57
3.2	Dimerizations and Spectroscopy	63
3.2.1	NMR Spectroscopy	65
3.2.2	UV-VIS Spectroscopy	74
3.2.3	Photoelectron Spectroscopy	75
3.3	Monomer-Dimer Equilibrium	78
3.3.1	Dimerizations and Polymerizations of Dinitroso Compounds	81

3.3.2	Vibrational Spectroscopy .....	84
3.3.3	Kinetics of Dimerization in Solid-State .....	86
3.3.4	Cross Dimerizations .....	95
3.3.5	Dimerizations of Heteroaromatic Derivatives .....	97
3.3.6	Calculations of the Reaction Path .....	98
3.4	Electrochemistry .....	100
3.4.1	Aromatic Nitroso Compounds as Spin Traps.....	102
3.5	Photochemistry .....	105
3.5.1	Photoreactions Including Nitrosoaromatic Intermediates.....	112
	References .....	113
<b>4</b>	<b>Organometallic Compounds .....</b>	<b>121</b>
4.1	Structures and Properties of Nitrosoaromatic-Metal Complexes .....	121
4.2	Nitrosoaromatic-Heme Complexes.....	134
	References .....	139
<b>5</b>	<b>Biological Systems .....</b>	<b>141</b>
5.1	Reactions with Fatty Acids and Steroids.....	141
5.2	Reactions with Thiol Consisting Biomolecules .....	142
5.3	Redox Reactions and Nitrosoaryl Compounds in Biological Systems .....	147
	References .....	149
	<b>Index .....</b>	<b>151</b>
