

Contents

1	Introduction.....	1
	Leslie Haley Wasserman and Debby Zambo	
2	The Practical and Ethical Concerns of Using Neuroscience to Teach Young Children and Help Them Self-Regulate.....	7
	Debby Zambo	
3	Neuroscience: The Genesis of Our Individual Brain Strengths.....	23
	Diane Connell and Jena VanStelten	
4	Reading and the Young Brain	43
	Nancy Frey and Douglas Fisher	
5	Brain Development, Early Childhood, and Brain-Based Education: A Critical Analysis.....	55
	Valeri Farmer-Dougan and Larry A. Alferink	
6	Addressing the Affective Domain: What Neuroscience Says About Social/Emotional Development in Early Childhood	77
	William A. Mosier	
7	Early Literacy Trends for Children Identified as At Risk for School Failure: Are They Consistent with Contemporary Neuroscience and Learning Theory?	105
	Rae Ann Hirsh	
8	Brain Differences in Children with Autism Spectrum Disorders and Subsequent Impact on Learning	121
	Diane Branson	
9	The Twice-Exceptional Young Learner	141
	Leslie Haley Wasserman	

10 Making a Case for Early Intervention: The Role of Developmental Neuroscience	157
Niamh Stack	
11 Effective Strategies to Help Teachers Learn About Brain Development.....	171
Billie Enz and Jill Stamm	
12 Metaphors of Developmental Process for Brain-Savvy Teachers	191
George G. Hruby	
Closing Thoughts: Remaining Optimistic, Cautious, and Active	207
About the Editors	213
About the Contributors	215
Index.....	219

Early Childhood and Neuroscience - Links to
Development and Learning
