1	The Nature of Scientific Understanding.....	1
1.1	Understanding in the Physical Sciences	3
1.2	Complex Physical Systems and Chaotic Behaviour	3
1.3	Complex Control Systems	4
1.4	The Brain and Hierarchies of Description	6
1.5	The Basis for Understanding the Brain.....	7
1.6	Computer Modelling and Its Limitations.....	8
2	Higher Cognition.....	9
2.1	Attention	11
2.2	Memory.....	12
2.2.1	Semantic Memory.....	13
2.2.2	Episodic Memory.....	13
2.2.3	Declarative Memory and the Distinction Between Semantic and Episodic Types	15
2.2.4	Working Memory	16
2.2.5	Procedural Memory	17
2.2.6	Priming Memory	18
2.2.7	Prospective Memory	19
2.2.8	Information Models for Different Types of Memory.....	19
2.3	Speech.....	21
2.4	Arithmetic	24
2.5	Face Recognition	24
2.6	Emotions	25
2.7	Hobbies and Intellectual Disciplines	26
2.8	Tool Making.....	27
2.9	Consciousness and Self Awareness.....	27
2.10	Individual Differences and Complex Society	29
2.11	Art, Music and Literature.....	30
2.12	Higher Cognition and the Brain.....	30

3 Brain Anatomy	31
3.1 Major Anatomical Structures of the Brain	31
3.2 Roles of Major Anatomical Structures	33
3.3 Neurons, Axons, Dendrites and Synapses	35
3.4 Ion Pumps	39
3.5 Ion Channels	41
3.6 Synapses and Their Response to an Incoming Action Potential	43
3.7 Dendrite Branches Integrating Action Potentials Arriving at Synapses	46
3.8 Generation of Output Action Potentials	49
3.9 Different Types of Neurotransmitter	49
3.10 Flow of Information Between Neurons	50
3.11 Electrical Activity of the Brain	50
3.12 Descriptive Gaps	51
4 Neuron Physiology	53
4.1 Neuron Morphology and General Electrical Properties	53
4.1.1 Major Physical Components of Neurons	54
4.1.2 Major Electrical Properties of Neurons	56
4.1.3 Structure of Neurons	56
4.1.4 Speed of Communication Between Neurons	57
4.1.5 Physical Differences Between Neurons	58
4.1.6 Internal Chemistry of Neurons	58
4.1.7 Permanence of Neurons	59
4.2 Molecules Embedded in the Neuron Membrane	59
4.2.1 Ion Pumps	61
4.2.2 Ion Channels	62
4.2.3 G-Protein Receptors	64
4.2.4 Tyrosine Kinase Receptors	66
4.3 Electrochemical Signals Within and Between Neurons	66
4.3.1 Action Potentials Between Neurons	67
4.3.2 Calcium Action Potentials Within Dendrites	69
4.3.3 Backpropagating Action Potentials	69
4.4 Synapses and Synaptic Strengths	70
4.4.1 Synaptic Strengths	70
4.4.2 Synaptic Strength Changes on Different Timescales	70
4.4.3 Management of Long Term Average Neuron Firing Rate	72
4.5 Specific Molecules	72
4.5.1 Neurotransmitters	73
4.5.2 Voltage Gated Ion Channels	85
4.5.3 Ca^{++} Activated K^{+} Channels	88
4.5.4 Second Messengers	89
4.5.5 G-Proteins	91
4.5.6 Kinases, Phosphatases and Phosphorylation	94
4.6 Chemicals and Information Processing	94

5	Intracellular Message Chains	97
5.1	Gene Expression	98
5.1.1	Transcription of mRNA	99
5.1.2	Translation of Protein	102
5.2	Kinase Cascades	103
5.2.1	Mitogen Activated Protein Kinase Cascades (MAPK Cascades)	104
5.2.2	Ca ⁺⁺ -Calmodulin Kinase Cascades (CaM Cascades)	106
5.2.3	cAMP-Protein Kinase A Cascades	108
5.2.4	cGMP-Protein Kinase G Cascades	109
5.2.5	G _q Activated Protein Kinase C Cascades	109
5.2.6	G _i Activated Protein Kinase B Cascades	109
5.2.7	Calcium-Calciueurin Cascade	110
5.2.8	Crosstalk Between Chemical Cascades	110
5.2.9	Specificity of Cascade Results	111
5.3	Neuron Processes	114
5.3.1	Integration of Inputs by a Neuron	114
5.3.2	Management of Long Term Synaptic Weight Changes	121
5.3.3	Changes to Neuron Integration Algorithm	129
5.4	Multiple Paths Contribute to Any Neuron Behaviour	130
6	Major Anatomical Structures	131
6.1	Sources of Information	131
6.2	High Level Structure of the Human Brain	132
6.3	The Cortex	132
6.3.1	Cortical Neurons	137
6.3.2	Cortical Synaptic Weight Changes	140
6.3.3	Cortical Connectivity	141
6.3.4	Cortical Layers	142
6.3.5	Cortical Columns	143
6.3.6	Cortical Hemispheres	145
6.3.7	Cortical Areas	145
6.4	The Thalamus	153
6.4.1	Thalamic Neurons	154
6.4.2	Synaptic Weight Changes in the Thalamus	155
6.4.3	Connectivity of the Thalamus	155
6.4.4	Role of the Thalamus	157
6.5	The Basal Ganglia	157
6.5.1	Dorsal Striatum	161
6.5.2	Subthalamic Nucleus (STN)	164
6.5.3	Globus Pallidus External Segment (GPe)	164
6.5.4	Globus Pallidus Internal Segment and Substantia Nigra Pars Reticulata (GPi/SNr)	165
6.5.5	Substantia Nigra Pars Compacta (SNc)	165
6.5.6	Ventral Striatum (or Nucleus Accumbens)	166
6.5.7	Ventral Pallidum	166

6.5.8	Ventral Tegmental Area (VTA)	167
6.5.9	Basal Ganglia Synaptic Weight Changes	167
6.5.10	Basal Ganglia Connectivity	168
6.5.11	Role of the Basal Ganglia	172
6.6	The Amygdala	172
6.6.1	Neurons of the Amygdala	174
6.6.2	Synaptic Weight Changes in the Amygdala	174
6.6.3	Connectivity of the Amygdala	175
6.6.4	Role of the Amygdala	177
6.7	The Hypothalamus and Pituitary Gland	177
6.7.1	Hypothalamic Neurons	180
6.7.2	Synaptic Weight Changes in the Hypothalamus	180
6.7.3	Hypothalamic Connectivity	180
6.8	Habenula	181
6.9	Cerebellum	182
6.9.1	Cerebellar Neurons	184
6.9.2	Cerebellar Connectivity	185
6.9.3	Cerebellar Microcomponents	188
6.9.4	Cerebellar Synaptic Weight Changes	188
6.9.5	Role of the Cerebellum	189
6.10	Basal Forebrain	190
6.10.1	Neurons of the Basal Forebrain Nuclei	190
6.10.2	Connectivity of the Basal Forebrain Nuclei	191
6.10.3	Synaptic LTP and LTD	192
6.11	Neurotransmitter Distribution Systems	192
6.11.1	Locus Coeruleus	193
6.11.2	Raphe Nuclei	194
6.11.3	Tuberomammillary Nucleus of the Hypothalamus	195
6.11.4	Midbrain Dopamine	195
6.12	The Hippocampal System	196
6.12.1	Anatomy of the Hippocampus Proper	198
6.12.2	Neurons of the Hippocampus Proper	198
6.12.3	Synaptic Weight Changes in the Hippocampus Proper	199
6.12.4	Hippocampal System Connectivity	199
6.12.5	Functional Roles of the Hippocampal System	204
6.13	Relating Structure and Function	204
7	Constraints on the Physical Architecture of the Brain	207
7.1	Conditions and Behaviours	207
7.1.1	Similar Conditions	208
7.1.2	Conditions on Different Levels of Complexity	209
7.2	Practical Requirements	209
7.2.1	Resource Limitations and Modular Hierarchy	210
7.2.2	Modifiability	211

7.2.3	Repairability.....	212
7.2.4	Constructability.....	212
7.2.5	Synchronicity.....	212
7.3	Behavioural Meanings of Condition Detections and Exchanges	214
7.3.1	Learning Systems and Partially Ambiguous Information.....	215
7.4	Pressures on the Definition of Modules.....	217
7.5	Hierarchy of Modules and Hierarchy of Descriptions.....	219
7.6	Sharing of Resources Across the Processing of Different Input States.....	220
7.7	Integration of Module Inputs on Different Levels of Detail	223
7.8	Limitations to Receptive Field Changes	224
7.8.1	Management of Receptive Field Changes	225
7.8.2	Implementation of Expansions	226
7.9	Entanglement of Condition Definition and Detection	227
7.10	Corollaries of Receptive Field Consistency	227
7.11	Modulation of Total Receptive Field Detection.....	228
7.12	Development of a Modular Hierarchy	228
7.13	Cascades of Condition Definition/Detection	230
7.14	Associations Between Receptive Fields and Behaviours.....	231
7.15	Types of Behaviour	232
7.15.1	Change Management Behaviours	233
7.15.2	Reward Behaviours	233
7.15.3	Indirect Activation Behaviours	234
7.15.4	Information Release or Attention Behaviours.....	236
7.16	Structure of Competition.....	237
7.16.1	Roles of Competition: The Behaviour Selection Subsystem	239
7.17	Modulation of Behaviour Type	240
7.18	Management of Frequent Action Sequences.....	241
7.19	Identification of Provisional Connections.....	241
7.20	Practical Requirements and Architectural Constraints	242
8	Appearance of Architectural Constraints in the Brain	247
8.1	Brain Structures and Information Processes	247
8.1.1	Information Process Based Architecture in the Brain.....	248
8.1.2	General Evidence for the Existence of the Recommendation Architecture in the Brain	249
8.2	Information Model for the Cortex.....	252
8.2.1	Cortical Areas.....	252
8.2.2	Cortical Columns	254
8.2.3	Column-Layers	256

8.2.4	Pyramidal Neurons.....	258
8.2.5	Terminal Dendrite Branches	260
8.2.6	Synapses and Neurochemistry	261
8.2.7	REM Sleep and Configuration of Provisional Connectivity	263
8.2.8	Modulation of Cortical Receptive Field Detection Signals	264
8.3	Information Model for the Thalamus.....	265
8.4	Information Model for the Basal Ganglia.....	268
8.5	Information Model for the Amygdala and Hypothalamus.....	275
8.6	Information Model for the Hippocampal System	278
8.7	Information Model for the Basal Forebrain	284
8.8	Information Model for the Cerebellum.....	284
8.9	Information Model for the Neurotransmitter Distribution Systems	288
8.10	Application of Information Models	288
9	Memory and the Organisation of Experience	289
9.1	Organisation of Experience into Similarity Circumstances.....	290
9.1.1	Information Basis of Receptive Field Definition	291
9.1.2	Description of Receptive Field Definition at Cortical Area Level	292
9.1.3	Description of Receptive Field Definition at Cortical Column Level	294
9.1.4	Description of Receptive Field Definition at Neuron Level.....	295
9.1.5	Description of Receptive Field Definition at Dendritic Branch and Synapse Levels	296
9.1.6	Description of Receptive Field Definition at Receptor Level	298
9.1.7	Description of Receptive Field Definition at Neurochemical Level	299
9.2	Detection of Similarity Circumstances	300
9.2.1	Detection of Receptive Fields at Cortical Area Level.....	301
9.2.2	Detection of Receptive Fields at Pyramidal Neuron Level.....	302
9.2.3	Detection of Receptive Fields at Dendritic Tree and Branch Level.....	303
9.2.4	Detection of Receptive Fields at the Neurochemical Level	303
9.3	Semantic Memory.....	304
9.3.1	Description of Semantic Memory at the Level of Cortical Areas	304
9.3.2	Description of Semantic Memory at the Level of Cortical Column Receptive Fields.....	309

9.3.3	Description of Semantic Memory at the Level of Neuron Receptive Fields.....	310
9.3.4	Description of Semantic Memory at the Level of Neuron Chemistry.....	311
9.4	Priming Memory	312
9.4.1	Description of Priming Memory at the Level of Cortical Areas	312
9.4.2	Description of Priming Memory at the Level of Neuron Receptive Fields.....	312
9.4.3	Description of Priming Memory at the Level of Neuron Chemistry.....	314
9.5	Episodic Memory	314
9.5.1	Description of Episodic Memory at the Level of Major Anatomical Structures.....	314
9.5.2	Description of Episodic Memory at Column and Neuron Level.....	319
9.5.3	Episodic Memory and Navigation	322
9.6	Procedural Memory	322
9.6.1	Description of Procedural Memory at the Level of Anatomical Structures.....	323
9.6.2	Description of Procedural Memory at the Level of More Detailed Anatomical Structures	325
9.6.3	Description of Procedural Memory at the Neuron Level.....	327
9.6.4	Description of Procedural Memory at the Neurochemical Level	328
9.6.5	Capturing Behavioural Sequences	328
9.7	Hierarchies of Description	328
10	Attention and Working Memory	331
10.1	Attention	332
10.1.1	Description of Attention at Anatomical High Level.....	333
10.1.2	Description of Attention at the Level of Receptive Fields.....	336
10.1.3	Description of Attention at the Level of Frequency Modulation of Cortical Action Potentials	339
10.1.4	Description of Attention at the Level of Synaptic Activity	339
10.1.5	Description of Attention at the Level of Neurochemistry	341
10.1.6	Conscious Attention	341

10.2	Working Memory	341
10.2.1	Description of Working Memory at Anatomical High Level.....	342
10.2.2	Description of Working Memory at the Level of Frequency Modulation of Cortical Action Potentials.....	345
10.2.3	Description of Working Memory at the Level of Neuron Mechanisms	346
10.3	Condition Definition/Detection Resource Sharing by Frequency Modulation.....	346
11	Understanding Complex Cognitive Phenomena	349
11.1	Imagined Situations and False Memories	355
11.2	Familiarity and Déjà Vu	356
11.3	Prospective Memory	357
11.3.1	Learning to Create Prospective Memories.....	365
11.4	Speech Processing.....	367
11.4.1	Bootstrapping Speech Generation.....	373
11.5	Cognitive Deficits Following Brain Damage	376
11.5.1	Hippocampal System Damage.....	377
11.5.2	Basal Ganglia Damage.....	378
11.5.3	Sensitivity of Prospective Memory to Dementia	378
11.6	Consciousness and Self Awareness.....	379
11.6.1	Vividness of Subjective Experience.....	379
11.6.2	Internal Stream of Mental Images.....	381
11.6.3	Verbal Accessibility of Internal Mental States: Dichotic Listening.....	382
11.6.4	Verbal Accessibility of Internal Mental States: Planning and the Moment of Decision.....	384
11.6.5	Self Awareness	384
11.6.6	Understanding Human Consciousness.....	387
11.7	Literature, Music and Art.....	387
12	Towards a Theoretical Neuroscience	389
