Preface	v
1. Sequential Advanced Guide Signing For Work Zone Related Rerouting On Highways	1
<i>K. Brijs, E. Jongen, G. Wets, and T. Brijs</i>	
1.1 Background	1
1.2 Problem Statement	4
1.3 Objectives	5
1.4 Research Questions	5
1.5 Methodology	6
1.6 Results	9
1.7 Discussion	14
1.8 Conclusion and Recommendations	16
2. The Relationship between Driver Fatigue and Monotonous Road Environment	19
<i>X. Zhao and J. Rong</i>	
2.1 Introduction	19
2.2 Literature Review	20
2.3 The Road Environment Monotony Evaluation	24
2.4 Methodology	28
2.5 Data Analysis and Results	32

2.6	Conclusions	36
3.	Driving Situation Awareness in Transport Operations	37
	<i>C. Ding, Y. Mao, W. Wang, and M. Baumann</i>	
3.1	Introduction	37
3.2	Models of Situation Awareness	39
3.3	Importance of Situation Awareness	44
3.4	Measurements of Situation Awareness during Driving	46
3.5	Driver Distraction on Situation Awareness	50
3.6	Applications of Situation Awareness	54
3.7	Conclusions	55
4.	Container Drayage Operations at Intermodal Terminals	57
	<i>A. Caris and G.K. Janssens</i>	
4.1	Introduction	57
4.2	Deterministic Annealing Algorithm	59
4.3	Numerical Experiments	61
4.4	Conclusions and Future Research	70
5.	Application of Genetic Algorithm to Optimize Transit Schedule under Time-Dependent Demand	71
	<i>H. Niu</i>	
5.1	Introduction	71
5.2	Problem Statement	73
5.3	Model	76
5.4	Genetic Algorithm	80
5.5	Numerical Example	83
5.6	Conclusions	85
6.	Validation of an Activity-Based Traffic Demand Model for Flanders	89
	<i>B. Kochan, T. Bellemans, D. Janssens, and G. Wets</i>	
6.1	Introduction	89
6.2	FEATHERSs	90

6.3	Albatross	91
6.4	Incorporating the ALBATROSS Model inside FEATHERS	91
6.5	Travel Demand and Traffic Assignment Model Chain	95
6.6	Validation of Flemish Simulation Results	97
6.7	Conclusions and Discussion	104
7.	Driver Behaviour in Conflict with Redcrossing Pedestrians	107
	<i>X. Jiang, W. Wang, and K. Bengler</i>	
7.1	Introduction	107
7.2	Vehicle-Pedestrian Conflict and Driver Behaviour	108
7.3	Methodologies	112
7.4	Data Analysis	120
7.5	Driver Yielding Behaviour Based on Logit Model	125
7.6	Conclusions	126
8.	Cellular Automaton Model and Simulation of Traffic and Mobility Operations	129
	<i>H. Xiong, X. Guo, and W. Wang</i>	
8.1	Introduction	129
8.2	Traffic CA model	131
8.3	Pedestrian CA model	139
8.4	Paired pedestrian CA model and simulation	146
8.5	Conclusion	157
9.	A Data Imputation Method with Support Vector Machines	159
	<i>B. Yang, D. Janssens, D. Ruan, T. Bellemans, and G. Wets</i>	
9.1	Introduction	159
9.2	Data Description	161
9.3	Data Imputation Method with SVM	162
9.4	Data Imputation Method with PNN and LDA	166
9.5	Results and Discussions	168
9.6	Conclusions	170

10. VLSN Search Method Based Hubs Location and Service**Frequency Determination****173***W. Xu and S. He*

10.1	Introduction	173
10.2	Problem Description	177
10.3	CMST for Hub Locations in Rail and Truck Freight Transportation Network	180
10.4	VLSN for the Hub Location Problem	182
10.5	Service Frequency Determination for the Hub-Spoke Network	186
10.6	Case Studies	188
10.7	Conclusions	193

11. Quantitative Risk Assessment for Traffic and Mobility Safety**197***W. Guo, W. Wang, H. Bubb, S. Xia, and F. Li*

11.1	Introduction	197
11.2	Basic Concepts, Definitions of Event, Incident and Accident	199
11.3	Fundamentals of Incident Tree Model and Incident Tree Analysis Method	202
11.4	Incident Tree Model	209
11.5	Incident Tree Analysis	216
11.6	Concluding Remarks	221

12. Investigating the Progress towards Sustainable Road Transport in Europe **223***Y. Shen, E. Hermans, T. Brijs, G. Wets, and K. Vanhoof*

12.1	Introduction	223
12.2	Efficiency Measurement based on a DEA Model with Undesirable Factors	227
12.3	DEA-based Malmquist Index for Productivity Change Assessment	230
12.4	Application and Results on Sustainable Road Transport Evaluation	234
12.5	Conclusions	240

13. Modeling of Traffic Behavior in Traffic Safety	243
<i>H. Guo, W. Wang, and H. Bubb</i>	
13.1 Introduction	243
13.2 Basic Concept and Theory	245
13.3 Reliability Analysis of Pedestrian Crossing Behavior at Signalized Crosswalk	256
13.4 Conclusion	265
14. Applications of Multi-Source Traffic Data on Mobility Analysis for Urban Road Network	267
<i>J. Weng, J. Rong, L. Liu, and Y. Zhai</i>	
14.1 Introduction	267
14.2 Available Data Sources	268
14.3 Travel Speed Computation and Forecasting	272
14.4 Multi-Source Data Based Traffic Incident Detection	288
14.5 Conclusions and Future Works	295
15. Practical Methods in Traffic Demand Forecasting Model	297
<i>L. Yao and L. Sun</i>	
15.1 Introduction	297
15.2 The Application of Disaggregate Model in Traffic Demand Forecasting .	298
15.3 The Application of Entropy Model in Traffic Demand Forecasting	311
15.4 Conclusions	319
Bibliography	321

Computational Intelligence for Traffic and Mobility

Wang, W.; Wets, G. (Eds.)

2013, XII, 340 p., Hardcover

ISBN: 978-94-91216-79-4

A product of Atlantis Press
