Contents

1 Overview of Materials Selection and Design 1
1.1 Introduction 1
1.2 The Importance of Materials Selection 2
1.3 Relation to Design 3
1.4 Product Analysis 3
1.5 Activities of Product Development 6
1.6 Case Examples of Product Development Stages 6
1.6.1 Product Development Activities for Piston-Cylinder Liner: Case Study 1 6
1.6.2 Product Development Activities for New Automotive Brake Pad: Case Study 2 9
1.6.3 Development of Automotive Fuel Tank: Case Study 3 13
1.7 Summary 14
1.8 Tutorial Questions 15
References 15

2 Mechanical Failure of Materials 17
2.1 Introduction 17
2.2 Mechanical Failure 18
2.3 Failure Due to Fracture 19
2.3.1 Ductile Fracture 19
2.3.2 Brittle Fracture 20
2.3.3 Ductile-to-Brittle Transition 20
2.4 Factors Affecting the Fracture of a Material 21
2.4.1 Stress Concentration 21
2.4.2 Speed of Loading 22
2.4.3 Temperature 22
2.4.4 Thermal Shocks 22
2.5 Griffith Crack Theory and Fracture Toughness 22
2.5.1 Factors for Fracture Toughness 23
2.6 Failure Due to Fatigue 25
2.6.1 Prevention of Fatigue Failure 25
2.7 Failure Due to Creep 26

2.8 Failure Due to Corrosion 29
2.9 Failure Due to Wear 30
2.10 Failure Analysis of an Electric Disconnector: Case Study 30
2.10.1 Introduction 30
2.10.2 Scope of Analysis 31
2.10.3 Visual Examination 31
2.10.4 Metallographic Examination 32
2.10.5 Mechanical Properties 33
2.10.6 Discussion on the Findings 36
2.11 Summary 37
2.12 Tutorial Questions 37
References 38

3 Design Phases 39
3.1 Introduction 39
3.2 Factors Influence Engineering Design 40
3.3 Major Phases of Design 41
3.4 Design Tool and Material Data 45
3.5 Design Reviews 47
3.6 Design Codes, Specification and Standards 48
3.7 Probabilistic Approach in Design 49
3.8 Factor of Safety and De-Rating Factors 49
3.9 Case Study on Automotive Brake Pad 50
3.9.1 Identification of the Problem 51
3.9.2 Functional Requirements 52
3.9.3 Detailed Design 52
3.9.4 Manufacturing Process 53
3.9.5 Challenges in the Design Phase 53
3.10 Summary 54
3.11 Tutorial Questions 54
References 55

4 Materials Properties and Design 57
4.1 Introduction 57
4.2 Materials Properties and Design 58
4.3 Design Under Different Conditions 60
4.3.1 Surface Finish Factor 61
4.3.2 Size Factor 61
4.3.3 Reliability Factor 62
4.3.4 Operating Temperature Factor 62
4.3.5 Loading Factor 62
4.3.6 Stress Concentration Factor 62
4.3.7 Service Environment Factor 62
4.3.8 Manufacturing Process Factor 63

4.4 Designs Against Fatigue Load 63
4.5 Design Problem 64
4.5.1 Design for Automotive Intake Manifold: A Case Study 65
4.6 Summary 67
4.7 Tutorial Questions 67
References 68

5 Materials Selection Process 69
5.1 Introduction 69
5.2 Events in Materials Selection Process 71
5.3 Materials Performance Requirement 72
5.3.1 Functional Requirements 72
5.3.2 Manufacturing Requirements 73
5.3.3 Reliability Requirements 73
5.3.4 Sustainable Requirement 73
5.4 Development of Different Solutions 73
5.4.1 Creativity Phase 74
5.4.2 Screening Phase 74
5.5 Quantitative Methods of Materials Selection 76
5.5.1 Cost Per Unit Property Method 77
5.5.2 Weighted Properties Method 78
5.5.3 Digital Logic Approach 79
5.6 Application of Digital Logic Method 80
5.6.1 Material Selection for Automotive Brake Disc: Case Study 1 80
5.6.2 Material Selection for Automotive Piston: Case Study 2 83
5.7 Optimum Material Selection 87
5.8 Material Selection for a Cylindrical Shaft: Case Study 3 88
5.8.1 Screening of Candidate Materials 91
5.9 Summary 93
5.10 Tutorial questions 93
References 98

6 Knowledge Based System in Materials Selection 99
6.1 Introduction 99
6.2 Expert System Components Facts 100
6.2.1 Rule-Based Reasoning 100
6.2.2 Database 101
6.2.3 Inference Engine 101
6.3 Architecture and Elements in Expert System 101

6.4 Benefits of Knowledge Based System 102
6.5 KBS for Optimum Selection of Materials: Case Study 1. 103
6.5.1 User Interface 104
6.5.2 Inference Engine 104
6.5.3 Database 104
6.5.4 Knowledge Base 105
6.5.5 Material Selection Process 105
6.6 KBS for Optimum Selection of Materials: Case Study 2. 106
6.7 KBS for Optimum Selection of Materials: Case Study 3. 108
6.7.1 Analytic Hierarchy Process 108
6.7.2 Materials Selection for Automotive Dashboard 110
6.8 KBS for Optimum Selection of Materials: Case Study 4. 112
6.8.1 KBS for Material Selection for Boat Components 112
6.9 Summary 115
6.10 Tutorial Questions 116
