## Part I Foundations of Attention

<b>1 Introduction</b> .....	3
Introduction.....	3
Varieties and Manifestations of Attention.....	5
Focused Attention .....	5
Selective Attention .....	5
Divided Attention.....	5
Sustained Attention .....	6
Effortful Attention.....	6
Intention and Directed Attention.....	6
Constraints on Attention .....	7
Neural Constraints .....	7
Processing Speed and Resources .....	7
Memory and Attention .....	7
Spatial–Temporal Constraints .....	8
Consciousness, Awareness, and Self-Directed Attention.....	8
A Unified Neuropsychological Model of Attention .....	8
Sensory Selection.....	8
Executive–Attention: Response Selection and Control .....	9
Focused Attention/Capacity .....	9
Sustained Attention .....	9
Neuropsychological Foundations.....	10
<b>2 Historical and Philosophical Antecedents</b> .....	11
References.....	16
<b>3 Cognitive Psychology of Attention: Foundations</b> .....	19
Communication, Control, and Information Processing .....	19
The Communication System.....	20
Information .....	20
Channels, Channel Capacity, and Coding.....	21
Noise and Redundancy .....	21
Meaning .....	22
Developments and Limitations .....	22

Psychology and Information Processing.....	23
Capacity, Channels, and Filters in the Human Nervous System ....	23
Models of Selective Attention.....	27
Selective Attention and Channels .....	27
Automatic and Controlled Processing .....	38
What Processes Are Automatic? .....	38
Automatization and Capacity.....	39
A Structural Model of Automatic and Controlled Processes .....	42
Capacity, Resource, and Skill .....	44
Performance Operating Characteristics .....	46
Critiques of Resource Models.....	48
Conclusions.....	50
References.....	51
<b>4 Cognitive Science of Attention: Current Concepts</b>	
<b>and Approaches .....</b>	<b>55</b>
Covert and Overt Orienting of Attention .....	55
Local and Global Processes .....	55
Flanker Compatibility .....	56
Perceptual Load .....	56
Inhibition of Return.....	57
Concurrent Task Performance: Divided Attention.....	57
Stimulus–Response Compatibility.....	58
Attentional Blink.....	58
Symbolic Control Processes .....	59
Attention Across Sensory Modalities.....	59
Attention-Executive Control System .....	60
Cognitive Science of Attention: Into the Future .....	61
References.....	62
<b>5 Intention, Response Selection, and Executive-Attention.....</b>	<b>69</b>
Late Selection Models.....	70
Capacity Constraints and Response Demands.....	71
Motoric Influences on Attention .....	74
Motor Activation During Covert Processing .....	75
Looking and Attending .....	75
Experimental Evidence of Premotor Attentional Control.....	79
Visual–Motor Integration During Attending.....	80
Executive Control of Attention .....	81
Disorders of Intention .....	82
Summary .....	82
References.....	83
<b>6 Focused and Sustained Attention .....</b>	<b>89</b>
Attentional Focus .....	90
Focus During Selective Attention .....	90
Focused Attention for Response Selection and Control .....	91
Focus and Divided Attention .....	92

---

Focused Attention and Working Memory .....	93
Processing Speed, Attentional Capacity, and Focus .....	94
Sustained Attention: Effort, Vigilance, and Fatigue .....	94
Vigilance and Sustained Attention .....	95
Psychophysical Determinants of Vigilance and Sustained Attention .....	97
Effort: An Attentional Constraint.....	98
Neurobehavioral Characteristics of Fatigue.....	101
Sleep and Circadian Effects on Attention and Fatigue .....	105
Conclusions.....	105
References.....	106
<b>7 Behavioral Perspectives.....</b>	<b>113</b>
Early Learning Theory .....	114
Classical Conditioning.....	115
Expectancy and Anticipation .....	116
Generalization .....	117
The Orienting Response.....	117
Habituation of the OR.....	118
The OR as an Attentional Index.....	118
Operant Conditioning.....	119
Discrimination Learning .....	120
Observing Responses .....	121
Blocking.....	122
Extinction: A Control Mechanism of Attention .....	122
Neobehavioral Contributions .....	123
Behavioral Inhibition .....	123
Conditioned Inhibition .....	124
Measurement of Behavioral Inhibition .....	124
Disinhibition .....	125
Cue Dominance.....	126
Drive and Motivation.....	128
Summary .....	129
References.....	130
<b>8 The Orienting Response: Index of Attention.....</b>	<b>135</b>
Stimulus Characteristics and the OR .....	135
Novelty and the OR .....	136
Information Content.....	136
Stimulus Uncertainty and Change .....	137
Stimulus Intensity and Duration .....	138
Interstimulus Interval .....	138
Characteristics of the OR.....	138
Habituation of the OR.....	140
Conditioning and the OR.....	141
Intentionality and the OR.....	142
Neural Mechanisms of the OR and Habituation .....	142
Dual-Process Theory.....	144
Alternative Theories of Habituation .....	145

Evaluation of Habituation Theories .....	147
Neuropsychological Evidence .....	149
Summary .....	152
References .....	152
