Foreword	vii
Preface.....	xi
Advertisement.	xiii

Volume IV.

Technical Applications of the Theory of the Top.

Chapter IX.

Technical applications.

§1. The most important formula in the theory of the top. Generalities on stabilization by the gyroscopic effect.....	761
§2. Gyroscopic effects in railway operation.	771
§3. The torpedo guidance apparatus. The Whitehead and Howell torpedoes.	782
§4. The Schlick gyroscopic ship stabilizer. Generalities and theory.	794
§5. Specialized discussion of the effect of the ship stabilizer.....	810
§6. Results and practical experience with the ship stabilizer.	833
§7. The gyroscopic compass.	845
§8. Stability of the bicycle.	863
§9. On alleged and actual gyroscopic effects for the Laval turbine.	884
§10. Miscellaneous applications.	899
A. Single-rail trains.	900
1. The suspension railway.	900
2. The monorail system.....	902
3. The system of Brennan and Scherl.	903

B. Nautical applications. 914

4. The paddle steamer. 914

5. The turbine steamer. 916

6. The gyroscopic horizon. 919

7. Remarks on aeronautics. 921

C. Ballistics. 922

8. The dynamic-hydrodynamic problem. 923

9. The general empirical facts of ballistics and the
 role of gyroscopic effects. 928

Translators' Notes. 937

References. 995

Index. 1005

The Theory of the Top. Volume IV

Technical Applications of the Theory of the Top

Klein, F.; Sommerfeld, A.

2014, XIV, 248 p. 53 illus., Hardcover
