1	Introduction	1
1.1	Motivations	1
1.2	Book Outline	3
2	Review and Basic Concepts	5
2.1	Introduction	6
2.1.1	Fault Detection and Diagnosis, Fault-Tolerant Control, and Fault-Tolerant Guidance	6
2.1.2	Interaction Between FDD, FTC, and FTG	7
2.1.3	Chapter Organization	11
2.2	Industrial State-of-Practice	11
2.2.1	General Ideas	11
2.2.2	Aeronautics	12
2.2.3	Space Missions	13
2.3	Review of Academic Advanced Results	14
2.3.1	Introduction	14
2.3.2	Analytical or Model-Based FDD	15
2.3.3	Recovery Aspects: FTC and FTG	17
2.4	Toward Advanced Model-Based Techniques for Flight Vehicles	19
2.4.1	Needs, Requirements, and Constraints	19
2.4.2	Case Studies	20
2.5	Conclusions	22
	References	22
3	Robust Detection of Oscillatory Failure Case in Aircraft Control Surface Servo-Loops	29
3.1	Introduction and Motivations	29
3.1.1	Primary Aircraft Control Surfaces	29
3.1.2	The Link Between FDD of Control Surfaces and Aircraft Structural Design	31
3.1.3	Oscillatory Failure Case	32

3.2	OFC in Aircraft Control Surface Servo-Loop	33
3.2.1	Description	33
3.2.2	State-of-Practice: In-Service A380 Aircraft Example	34
3.2.3	Motivations for an Advanced Model-Based Approach	37
3.3	Verification and Validation Tools	38
3.3.1	Airbus Aircraft Benchmark (AAB)	40
3.3.2	Functional Engineering Simulator (FES)	40
3.3.3	Industrial Assessment Criteria	41
3.4	Nonlinear Observer Design	43
3.4.1	OFC Detectability	43
3.4.2	Proposed Detection Algorithm	45
3.4.3	Decision-Making Rule	52
3.4.4	Experimental Results	54
3.5	Fault Reconstruction via Sliding-Mode Differentiation	57
3.5.1	Design of Hybrid Differential Observer	58
3.5.2	Experimental Results	64
3.6	Conclusion	70
	References	70
4	Robust Detection of Abnormal Aircraft Control Surface Position for Early System Reconfiguration	73
4.1	Introduction	73
4.2	Industrial State-of-Practice	75
4.3	Need for Improvement	77
4.4	A Dedicated Kalman-Based Solution	78
4.4.1	Runaway	78
4.4.2	Jamming	81
4.5	Experimental Results	82
4.5.1	Airbus Aircraft Benchmark (AAB) and Real Flight Data	82
4.5.2	Validation and Verification on Airbus Test Facilities	86
4.6	Conclusion	88
	References	89
5	Failure Detection and Compensation for Aircraft Inertial System	91
5.1	Introduction	91
5.2	Failure Detection and Isolation in Aircraft Inertial System	94
5.2.1	Problem Statement	94
5.2.2	Classical Triplex Monitoring	94
5.3	Enhanced Detection and Compensation Scheme	95
5.3.1	OFC Detection and Isolation Module	97
5.3.2	Consolidation Module	102
5.4	Simulation and Experimental Results	106
5.4.1	Simulation Setup	106
5.4.2	Single OFC Scenario	108
5.4.3	Combined OFC Scenario	110

5.4.4	Other Faults	112
5.4.5	Discussion	114
5.5	Conclusion	114
	References	116
6	An Active Fault-Tolerant Flight Control Strategy	119
6.1	Introduction	119
6.1.1	Problem Statement	119
6.2	Fault-Tolerant Control Architecture	120
6.2.1	FTC with a Model-Based FDD Scheme	121
6.2.2	FTC with Dedicated Onboard FDD	122
6.2.3	Analysis of FTC Architecture	123
6.2.4	Formulation of FTC Design	125
6.3	Bumpless Scheme	127
6.3.1	Solution with a Model-Based FDD Scheme	127
6.3.2	Solution with Dedicated Onboard FDD	129
6.4	Application to a B747-100/200	130
6.4.1	Requirements and Validation Tools	130
6.4.2	B747-100/200 Benchmark	132
6.4.3	FTC Problem Formulation to FM-AG(16) Project	134
6.4.4	FTC Design	136
6.4.5	Simulation and Experimental Results	140
6.5	Conclusion	145
	Appendix A: State and Input Definition of the Boeing 747-100/200	146
	Appendix B: A , B_e , B_h , and C State-Space Matrices	146
